

# HOW TO GROW YOUR MUSHROOM

# Pink Oyster

## THE FRUIT

Pink, thin, soft, shelf-like shape, with a short, asymmetrical stem.

## TEMPERATURE

Cropping requires an optimum temperature of 20-30°C

## HUMIDITY

Mushrooms need very high humidity to form. Around 80-90%. That's why you need to spray your kit with water everyday. It also helps to leave it in a semi-closed plastic container.

## SPECIAL

Pink Oyster is a tropical mushroom. It doesn't like the cold. You can try placing your kit in a plastic container for optimum results.

## BEFORE USAGE

You can leave the kit at room temperature for up to a month before you use it.
