

HOW TO GROW YOUR MUSHROOM

SHIITAKE

THE FRUIT

TEMPERATURE

Cropping requires an optimum temperature of 22-26°C

HUMIDITY

Mushrooms need very high humidity to form. Around 80-90%. That's why you need to spray your kit with water everyday. It also helps to leave it in a semi-closed plastic container.

SPECIAL

Shiitake, likes to grow on every side of the substrate. For optimum results you can take it out of the box and place it in a large plastic container

BEFORE USAGE

You can leave the kit in the fridge for up to a month before you use it.
