About the Farm

Friends of the Trees Botanicals has been growing and wildcrafting a wide variety of high-quality medicinal plants for 28 years! Our 1/2 acre Organic herb farm is located at Finnriver Cidery in Chimacum, WA. We also manage a 2-acre agroforestry project called **Twisp River Medicinal Forest** located in Twisp, WA. This was started in 1999 by our founder Michael Pilarski.

Our plantings are complex perennial polyculture systems which include medicinal herbs, trees, shrubs, hedgerows, berries and culinary herbs. We use permaculture and restorative land practices.

Sustainable Wildcrafting

Our wildcrafted botanicals are sustainably harvested to maintain healthy plant populations.
