Blue Ribbon Prostate Clinic
The Urology Centre of Excellence

I always recommend Vacurect Vacuum Therapy system to my patients

It is a manual USFDA approved Vacuum Erection device.

I am recommending this to all my patients as treatment option for erectile dysfunction due to Diabetes / Heart Disease / After Prostate Cancer treatment.

It is also used prior to penile Implant for 4-6 weeks to help maximise length and girth of pens with penile Implant. Most of the patients report

Blue Ribbon Prostate Clinic.
67/1, New Rohtak Road, Karol Bagh, New Delhi - 110005

High Satisfaction rate with this device-
It is safe, non surgical treatment
for ED in patients where medicines
are not working or medicines have
side effects.

Starting vacuum therapy 1 month after
Radical Prostatectomy help in retaining
penile length, preventing penile fibrosis
and early return of natural erections
in patients who use vacuum therapy
as part of penile rehabilitation.

It is a cheap 1 time investment for
treatment of ED. No need to take expensive
medicines or undergo any surgery.
