### HEALTH CERTIFICATE

Undersigned, **Dr. RASOANARIMALALA Harimanana**  
**Vétérinaire - Inspecteur**, Official Veterinarian at the  
Directorate of Veterinary Services in Madagascar, I certify that honeys from Madagascar are  
safe and suitable for human consumption according to physical-chemical and  
microbiological results criteria <sup>(1)</sup> the Control Agency for Hygiene and Foodstuffs Quality,  
whose accreditation is made by **the European Union following CODEX standards**, ref: NM  
060-01-01, Malagasy standard for honey, on September 14, 2004.

Honeys from Madagascar are harvested only in regions recognized by the Veterinary  
Malagasy Division, EXEMPT of transmissible contagious diseases by bees according to OIE  
list<sup>(2)</sup> for the past two years.

In witness whereof, this certificate is issued to them to serve and assert that right.

Antananarivo, on **22 MARS 2019**

*Hay*  
**Dr. RASOANARIMALALA Harimanana**  
**Vétérinaire - Inspecteur**

<sup>(1)</sup> Humidity, acidity, insoluble materials, sugar reducers, sucrose

<sup>(2)</sup> The Nosemosis, the Acariasis, fowlborood and the Varroas
