

## The NACHO Quatro Flush Mount Kit

### Includes:

2 - Flush Mount Bezels

4 - Flush Mount Backing Plates w/ threaded bosses

2 - Angled Molded Gaskets

2 - Straight Molded Gaskets

8 - Mounting Bolts

1. Drill your desired location using the provided template.
2. Assemble the backing plates to each side of the light and insert the light from the backside of the hole.
3. Thread the provided bolts into the backing plates from the front through the flush mount plate.
4. Aim the light, then tighten the backing plates to the light once the light is aimed.
5. Double check all hardware!

\*this kit requires the Quatro to have the body of the light removed

Flush Mount Template
