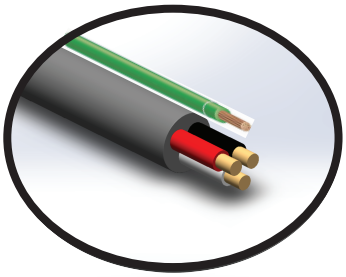
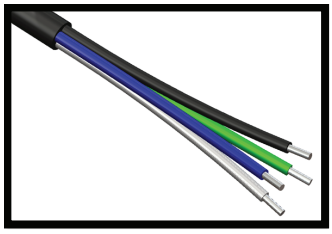
Instruction Sheet



Harness



Quatro

Harness Side	to	Quatro Side	Function
White Wire		White Wire	Lower 3 LEDs
Red Wire		Blue Wire	All Projection LEDs
Black Wire		Black Wire	Ground
Green Wire		Green Wire	Trail Running Light

Harnes to Switch

Solid Red is Main power and will go to Pin #2 in each switch.
(total of 4 power wires, ignore the two caped off)

The supplied switches are not backlit and do not require the two grounds in the harness. (you would use these for lit switches)

The Red/White wire will go to switch 2

The White wire will go to switch 1

Connect the trigger wire to any power source such as running lights for the TRL

Please secure all unused wires and reference the Quatro wire configurations document for other wiring options
