

CJC-1295 + Hexarelin 5/5 - SAF 2

Hexarelin ,which is a potent stimulator of the growth hormone secretagogue receptor. When combined with CJC-1295, a growth hormone releasing hormone receptor agonist, the two GH stimulants boost both baseline and peak levels of GH in animal models. Both peptides have positive effects on cardiac (heart) muscle. Research shows an increase in muscle strength while taking CJC-1295. Research Benefits of Hexarelin: Joint healing (not masking or false pain relief, but actual healing) Fat Loss Muscle Building Strengthening of the Neural system Muscle fiber repair (ideal for injuries) Direct increase of bone density

Mod Grf 1-29 Hexarelin 10mg Blend-CJC-1295 w/o dac with hexarelin 10mg | AUSTROPEPTIDE

CJC 1295 takes from 1-4 hours to reach peak levels in the bloodstream, but Ipamorelin works much faster. CJC 1295 has a very long half-life, whereas Ipamorelin has a half-life of about 2 hours, so it's cleared from the body quite quickly. Combining these two proteins ensures a rapid onset from Ipamorelin with lasting effects from CJC 1295.

CJC 1295 DAC Dosage. It is advised to start with CJC-1295 DAC 2mg that is diluted with 2ml of sterile water for injection bactericidal. It is best to store the peptide in diluted form, preferably germicidal water. The recommended CJC 1295 DAC dosage is 30-60 g per 1 kg of body weight per week.
