

KEONJINN

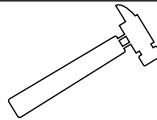

Installation Preparation

Level

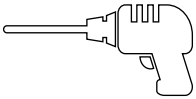

Pencil

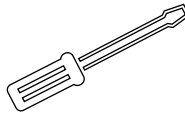

Hammer

Safety Goggles

Electric Drill

Phillips Screwdriver

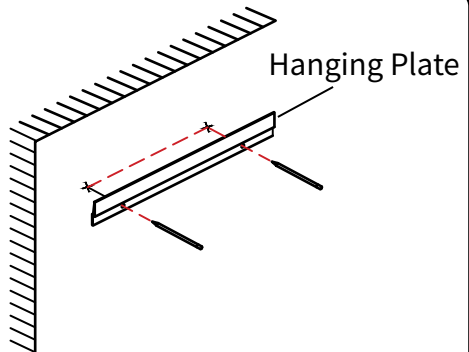

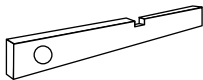

Tape Measure

We recommend that the installation be carried out by 2 persons.

INSTALLATION OF MIRROR

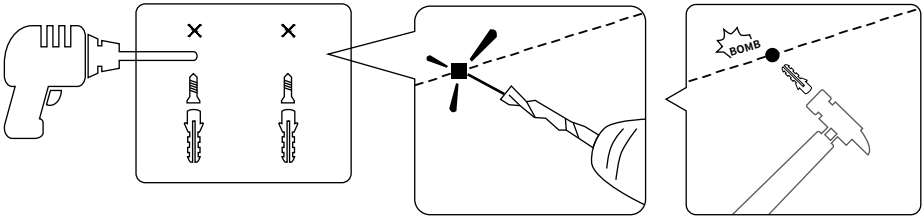

Mounting point measurement

Mark the mounting holes on the hanging plate against the plate and use a level to make sure the plate is level.

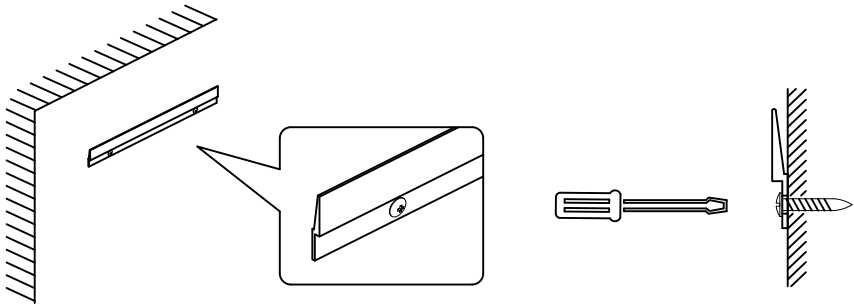

The short hanging plate is used for vertical installation of mirrors.
The long hanging plate is used for horizontal installation of the mirror.

Drill pilot holes on the marked spots

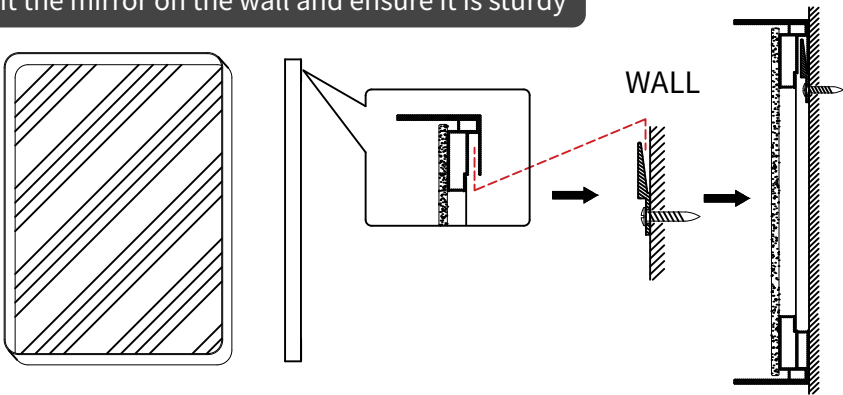

Use an electric drill to punch four 6mm holes at the marked spots, and then apply wall anchors with hammer.
(6mm drill bit, drilling depth in 5 cm)

Screw the hanging plate

Mount the mirror on the wall and ensure it is sturdy
