A modern office interior with a high ceiling, large windows, and a grid of ceiling lights. The office is furnished with desks, computers, and office chairs. The partitions are a vibrant green color. Several potted plants are placed throughout the office, including a large black planter box in the foreground and a hanging planter. The floor has a yellow and blue striped pattern.

Plants add zest to our living. Their vibrancy and multi-colored exuberance, along with their constant growth, provide us with a very encouraging backdrop to our efforts.

Plants help us to stay healthy. NASA scientists say, 'plant leaves, roots, and soil bacteria can dramatically reduce levels of toxic vapors.' Much like a space shuttle, our tightly packed buildings retain toxic gases. Then we have polluted indoor air, leading to 'sick buildings.' NASA research shows, again, that green plants clean the air, 'curing' the 'sick buildings'.

Since 2015 "Hug A Plant" has been one of the leading firms working in gardening sector.

We offer complete professional interiors cape services in offices throughout Kochi. We have beautified corporate offices, banks, hotels and other commercial areas, as also public institutions and residences

Even before a plant arrives at your office/interiors, our designer will visit you and discuss your requirements. Consideration will be given to lighting, plant size and personal taste.

Once our plants are installed, our comprehensive maintenance program/Rental Service, takes care of the plants, without any hassles for you.

Our service program includes

- Monthly Plant care & Fertilization.
- Monthly cleaning of foliage and removal of damaged leaves.
- Replacement of sick plant once in a month.
- Periodic visits by our team.
