

# Lightweight Dual Camera Full HD Encoder

Designed for your UAV Visible & IR Needs

**FV2K-15A** 

- Dual LVDS Camera Input or LVDS and a Composite Input
- · High Quality Low Latency Encoding
- Transport Camera Control Controls over IP
- H.265 or H.264 Video Encoding, Streaming, and Recording
- Lightweight for UAV & other weight constrained Applications

The FV2K-15A is designed for dual camera unmanned system, inspection, surveillance, and industrial applications. The flexibility of the system allows for a visible camera and an infrared or night vision camera. The hardware consists of a small 2-board set: Input, Encoder and Connector PCB. The system is capable of encoding multiple channels of H.265 and H.264 video in HD resolutions. The Input board features flexible digital and analog input ports.

 $\mathbf{Z}^{\mathbf{3}}$ Technology $^{\circ}$ 

Z³ Technology is an industry-leading, USA-based manufacturer of production-ready embedded multimedia solutions and IP camera systems. From our founders to our world-class engineers to our sales and customer service team, we understand your requirements and speak your language. Our experience allows us to provide cost-effective solutions to meet your multimedia product requirements. With the assistance of our robust worldwide distribution and sales networks, we can provide a simple solution for your multimedia needs.
