

Ceiling Grids

Commercial and architectural construction markets have relied on the flexibility and versatility of Unistrut Ceiling Grids for years. Typically supported by threaded rod, ceiling grids are ideal for supporting miscellaneous MEP and decorative panels, as well as offering infinite adjustment of lighting in galleries, shops, restaurants and more.

DECORATIVE CEILING GRIDS

In addition to providing structural support for electrical and mechanical systems, Unistrut ceiling grids can also serve as support for decorative or design elements, creating stunning ceiling site lines with a high-tech look and feel.

Applications

- Ceiling support
- Lighting support
- Electrical support, including raceways
- Load support for HVAC components
- Manufacturing tool support
- Shelving support
- Forming decorative environmental elements
- Creating ceiling site lines
