ATLANTIS

Atlantis Mattress is Australian-made and environmentally friendly. It's engineered with higher standards and unique comfort adjustability, allowing you to tailor each side of your mattress with your preferred feel.

Caring instructions and tips are at the reverse to take care of your mattress.

Atlantis Mattress is Australian-made and environmentally friendly. It has a unique construction to create the perfect feel for your body.

You have the option of firm, medium and plush, as well as customize the feel if you are not comfortable with it.

Atlantis Components

1. Sea-Soft Fabric Cover

Premium Australian-made sleeping surface fabric, combining Seaqual & Tencel, which are naturally responsibly sourced yarns. SEAQUAL is a unique fibre made from rescued plastics from our oceans and transformed into a beautiful and versatile yarn.

Combined with renewable Tencel, this creates an ultra-soft, breathable and moisture absorbing fabric that is uniquely soft as well as environmentally friendly.

2. Hybrid-Flow layer

Our advanced premium comfort layers provide the ultimate pressure relief and support due to their conforming properties. In addition, their open-cell structure ensures mattress breathability for a more optimum sleeping temperature.

3. Atlantis Comfort-Adjust

Our unique high conforming comfort system allows for personalized comfort for superior sleep. Choose the firmness the way you like it. This unique comfort system can be adjusted to be firmer or softer and works to allow for individualised comfort on each side of the mattress.

How to take care of your Atlantis Mattress

Below is some valuable information on how to take care of your Atlantis mattress so you can enjoy it night after night.

- To keep the mattress clean, we recommend you use a mattress protector.
- Remove and dispose of the plastic bags immediately and keep your mattress dry, protecting it from water and other fluids.
- Rotate your mattress every month to ensure even wear.
- The single Hybrid-Flow layer must always remain as the upper layer.
- Avoid using dry cleaning liquid of any type on your mattress as these products will damage materials.
- Do not remove and wash inner fabric covers.
- Avoid standing or jumping on your mattress and using the edges as a sitting surface; it will cause damage to the spring/ foundation.
- Do not use the mattress handles to lift it; They are there to position your mattress only, not for lifting the total weight of the mattress.
- Avoid bending your mattress under any circumstances.
- Ensure you are using a suitable and supportive foundation for your mattress to ensure great performance.
- In order to change the feel of your mattress, unzip the upper panel, interchange the comfort adjust to your preferred side of the mattress.

Comfort-Adjust system

In order to get the right feel on your side of the bed, unzip the mattress and switch the bottom comfort later (Half feel cover).

Proudly Australian Made

100 Night Comfort Guarantee

If for any reason, you are not satisfied with your mattress within the first 100 nights, we will offer you a full refund of your original purchase at no cost and free collection for all Metro areas.

We also offer a free comfort adjustment to tailor the feel of your mattress if it is just not right for you. We only ask you to try to the mattress for 21 nights first to make the change.

Mattress: You have 10 years Factory warranty

Slats and platforms beds

The use of slat foundation and other bedding furniture may result in damage being caused to your mattress. The use of a soft, sagging or non-supportive base such as bowed posture slats or narrow tubbing, which in our reasonable opinion is not supportive, will void this warranty.

Body Impressions beyond 35mm

The sleeping panel on your mattress is made of a combination of high-performance foams. When the mattress is new, the panel will look uniform in appearance. However, as the mattress wears, those layers will respond to your body and reduce marginally in the loft; This will not affect the performance. Instead, it highlights that the layers are performing as they should.

In these particular circumstances, the warranty does not cover:

- Stains, soiled, or burns on the mattress fabric.
- Normal body impressions (less than 35mm).
- Bedding sold as is
- Heat issue.
- Damage due to abuse.
- New mattress material odor.
- Minor manufacturing anomalies that do not impact the bed's performance (e.g., mis-stitching on quilting)
