## Beef Cutting Instructions

All Beef orders contain 40% ground beef. Do not select the ground beef option, unless you want to reduce the amount of roasts or steaks, and increase the amount of ground beef you get. The most common choice is automatically selected. Simply select a different option if you like. If you have any special requests please insert them in the comments section below. \*NOTE Depending on your request we may not be able to accomodate. Please try to stay within these guidelines set out in this cutting form. We cannot accomodate excessive special cutting instructions.
