

# FLARE™ WINDSHIELD

REDIRECT THE WIND TO IMPROVE YOUR RIDE

The Klock Werks Flare™ Windshield was originally developed out of a need for stability at high speeds while racing on the Bonneville Salt Flats. This innovative and patented design features “hips” on the sides that re-route air to create downforce on the front of the bike while the “flip” at the top kicks the air up, sending it back as clean, less turbulent air for the rider and passenger. The Flare™ has fundamentally changed the way we ride.

## BUILT TO LAST

Made from hard-coated polycarbonate for superior strength and durability

## SLEEK STYLING

The trademark sleek styling of the Flare™ compliments your bike

## MADE IN THE USA

We source from companies we know and trust, supporting communities in the USA
