

HANDY DANDY MEASURING TOOL

To help determine which size nomad+ is the right one for you, follow these steps:

1. Print this document.

When printing, double check it's printing at 100% or actual size to ensure proper scale. **DO NOT SCALE TO PRINT.** If you want to double check your work, place a measuring device next to the ruler below. They should match.

2. Cut on the dotted line. (Use those skills you learned back in Kindergarten.)
3. Lay the appropriate end on the bar and wrap around.
4. If the edge at the arrow falls within a black box, that's the size you need!
