Once the iOdisc is adhered to your device, connect to iOstands®, model-specific mounts, and more!

INSTALLATION

ADHERE
Clean the surface of your device case thoroughly. Center the iOdisc™ on your case then apply with firm pressure to the case while on a flat surface and adhere.

Allow adhesive to set at least 24 hours before attaching to iOcore. For best results, let set 72 hours before first use.

INSTALL
The iOkwik is designed to quickly attach to *any* magnetic surface. Simply place the iOkwik on any flat magnetic metal surface. Common locations are gym equipment, tool boxes, metal posts, metal panels, etc.

Optional. Flip the iOkwik! The iOkwik was designed with the iOcore attached to the device, but this product can be used both ways. Simply flip the iOkwik around, attaching the body to the device, and the iOcore to the metal surface.

ATTACH
Once the iOdisc™ has cured for 24 hours, your device is ready to be attached to *any* iOmount®!

Watch this video and learn how to adhere the iOdisc™ correctly to guarantee a wonderful experience.

GETKLOCKED.COM/HOW-TO

FYI

➡️ While a very strong 3M VHB adhesive is used, the iOdisc™ will not stick to all surfaces and materials. This includes rubber, silicone, soft-touch and other soft or textured surfaces.

For best results, Klock Werks recommends the use of a smooth plastic, non-silicone case.

➡️ Each iOdisc™ utilizes permanent adhesive and is very difficult to remove once applied. *Klock Werks is not responsible for any damages caused by the removal of the iOdisc™.*
