

# Compost Producers in California

August 2023

---

**Why use high-quality compost?** Compost provides many benefits to soil, including:

- Increases water retention and infiltration rate
- Improves nutrient levels and balances
- Promotes good soil structure and deeper root growth
- Adds/attracts beneficial organisms
- Sequesters carbon and builds resiliency to climate change

## Compost Reimbursements

[Zero Foodprint](#), a California-based non-profit, has launched a compost reimbursement program in connection to Senate Bill 1383. Through their online portal, users can submit invoices from approved compost vendors (see below) and receive a partial reimbursement for their compost purchase.

## Navigating Compost Approval Programs

There are three main vetting programs for compost producers, as seen below:

1. US Compost Council – *A nationwide non-profit that aims to advance compost manufacturing, compost utilization, and organics recycling to benefit its members, society, and the environment.*
2. Association of Compost Producers – *California state chapter of the US Compost Council (overlaps with USCC).*
3. CalRecycle - *Conducts compost and mulch outreach in California in association with SB 1383. Approved vendors here are eligible for reimbursement through Zero Foodprint.*

## **US Compost Council Members**

### **Agromin - Agromin OC Oceanside Green Materials**

PRODUCT - Compost 100 - *Tested once every month*  
1400 Wilshire Rd  
Fallbrook, CA, 92028
