

FABRIC SIGN GUYS™

Step & Repeat Banner Assembly Guide

Step 1: Unpack all the contents of the carry bag and remove the screw nozzle from the end of the poles.

Step 2: Find the 2 largest poles and attach each pole to the base as shown. Tighten the pole with the screw and allen key provided.

Step 3: To create the top horizontal bar, attach the poles together by matching the green circles.

Step 4: Repeat step 3 by matching the red circles. Both of these poles should now attach together to create your top horizontal bar.

Step 5: The remaining poles should make up your bottom horizontal bar. Screw them together as shown. You should now have 2 horizontal bars setup.

Step 6: Focus on one side first and attach the bottom horizontal bar to the bottom of the base using a screw nozzle. This step is much easier with some assistance.

Step 7: On the same side, attach the top horizontal pole to the top of the vertical bar using a screw nozzle.

Step 8: Feed your fabric onto both horizontal poles through the rod pockets. Slide all of the fabric along the pole till the end.

Step 9: Attach the open side of the horizontal poles to the other base and vertical pole. Once they are attached, evenly smoothen out your fabric on both horizontal poles. Adjust the height of the pole and set as needed by twisting the poles to open and lock.
