

The WatchGas PDM mono Family Bump & Docking Station keeps the monitor correctly configured and tested and fully functional. Bump testing portable monitors is becoming more and more prevalent in the market.

Ensuring sensors are responding to a known concentration of gas remains the best way to verify the monitor has not become impeded.

WatchGas PDM Family Mono Bump & Docking Station provides bump testing, event management and calibration from a simple to use station. It also maintains the all important event logs that demonstrates users are working within company requirements.

The PDM and PDM+ can be calibrated or bump tested automatically with out the use of a wall socket, making this mono dock ideal for an n-site use where sockets can be scarce.

Key Features

- User friendly single button operation
- Efficient because of wide operating temperature range
- Easy to transport and lightweight
- Battery powered
- Automatic log storage

DOCK SPECIFICATIONS

Size	18.2 x 22.8 x 9.2 cm
Weight (without gas cylinder)	885grams
Operating Temperature	5 To +40 C
Battery Life	1600 bump tests
Memory	8GB included
User Options	Location, Gas expiration date, Gas lot number, gas concentrations, bump/Cal time.

ORDER INFORMATION

Description	Article Number
PDM Family Mono Bump & Docking Station	7189172
<i>Only in combination with demand flow regulator</i>	A0177744

ACCESSORIES

NOTES

IR-Link

Calibration Gases
