

Royal Foam

Decorate your home!

Serving Southeast
America
Expanded
Polystyrene
Manufacturer
of Architectural
Composites

Royal Foam Inc. is Jacksonville's only vertically integrated, premier custom fabricator of interior and exterior architectural design foam composites. Privately owned, Royal Foam is focused on being a totally hands on, customer friendly supplier dedicated to accommodating the varying needs of contemporary building industry.

The management of Royal Foam is dedicated to assure that only products meeting the highest standards for safety, appearance and durability will be distributed. We start the process by controlling the raw materials we use and follow the product to meet our customers' specific demands.

Royal Foam is conveniently located to serve the Southeast's finest architects, designers, contractors as well as with individual customers. We can take the product as little or as far as your needs demand.

Royal Foam

Royal Foam columns can be installed inside or outside your building to add beauty and value to your property. Our columns are lightweight made out of expanded polystyrene, coated with a polyurethane hardcoat and finish that makes it look like a real stone column. We can cut columns to half, quarter, or any other custom shape to fit around square post or corners. All Royal Foam columns are treated as custom orders and are manufactured to the highest quality. At Royal Foam we specialize in customizing, not standardizing our products to the customers' requirements. If you wish to have a column that is over 10 feet in diameter we will do it, as we did for Universal Studios for their Posidons Fury attraction.
