GMT Ltd. is a team of highly motivated and skilled people who, in 2008, united their visions and abilities into one company. Today GMT Ltd. is an inventor, creator and manufacturer of high quality skin care cosmetics for professional use and selective cosmetics for home use under the brand name GMT BEAUTY.

We, the people at GMT, have a strong belief that what we do is important, and helps people to look in the mirror with a confident smile. But together we can do much more. We support our Partners with our unique knowledge and skills. We provide our Partners with an effective formula which slows down the ageing process and unleashes the individual energy of each cell in the human body for enhancing and improving the desired result. We promote our revolutionary, unique, and different approach to the aesthetic challenges of the human body. We supply our Partners with natural products of the latest biotechnology, which are both suitable as a solution to aesthetic problems and for the prevention of undesirable skin issues appearing over time, and with products which are suitable for both manual and mechanical technologies. We work hand in hand with our Partners.

NATURA

CONCEPT

is a uniquely new approach to the requirements for the cosmetics industry which drastically altered the understanding of true skin care. All compounds are only of natural origin, beginning with a chemically pure base for products. Combinations of active ingredients were designed to prevent or solve undesirable skin changes and aesthetic problems of the human body where and when the skin needs it.

Expecting

GMT BEAUTY has created a unique product line Expecting to maintain skin health during pregnancy and breastfeeding. Deep understanding of challenges of this happy time has helped to formulate products that will be beneficial for pregnant women and young mothers. It includes products that reduce and prevent stretch marks, reduce swelling, and soothe sensitive and dry skin. Expecting line was approved by Latvian Association of Gynecologists and Obstetricians.

ROSE SALT FOR BATH

One of the world's purest and most natural salts deposited for more than three million years at a height of 2,000 m in the Bolivian Andes, which has remained unblemished under a layer of ancient lava. Hand-processed Rose Salt contains many valuable minerals and is ideally suited for various beauty care treatments. This special finely ground salt is ideally suited for use in massage treatments and is also a great scrub. It is wonderfully suited for use as an additional product in various SPA treatments. Rose Salt's pink hue is due to its high iron content, which is much higher in this salt than in ordinary salts and sea salt. In addition to its natural iron compounds, Rose Salt contains more of the minerals which are so important to the human body: potassium, calcium and magnesium.

Use: fill the pinda pouch with salt, heat it up to the required temperatures or dip it in warm oil and carry out massage treatment. Hydro-massage and/or balneo-therapy: a 1.5-5% salt solution/salt concentration is dosed as required. Can be used in a hip-bath or during an all over body swim. Not to be used for more than 20 minutes at a temperature of 37-42°C. In cases of vein problems, it is recommended that you choose a moderate water temperature (~37°C).
WARNING! For use on undamaged skin only. Never use after waxing!

ROSE SALT SCRUB

Sodium and potassium: usually function concurrently, ensuring generation and transmission of nerve impulses, maintaining normal body osmotic pressure. Sodium and potassium control the balance of water in skin cells and improve tissue plasticity. Potassium improves the supply of energy to the cells, stimulating cell microcirculation and regeneration. It facilitates the entry of nutrients into the cells through the cell membrane.

Use: before use, mix the salt scrub in the palm with a small amount of water and apply to moist body skin using light movements. Carry out a light massage using circling movements, continuing to moisturise your hands. Then rinse off the remainder in the shower or remove using a damp towel. SPA treatment for the whole body salt, oil and algae mixture. Apply to the mixture to body; carry out light massage and wrapping treatment. Use of a thermal blanket is recommended.
WARNING! Only to be used on undamaged skin. Never use after waxing!
