From charcoal burning to powdered carbon, the whole process is completed in our own factory to ensure that the raw materials are mixed evenly and there are no impurities, so that the finished products have no particles and the drawing is smooth.

The luminosity of the matte lead is lower than that of graphite lead about 50%, pictures are not reflective .

Underglaze Colored Pencils

Before Glazing

After Glazing

Making your own glazes for your pottery can be both experimental and exciting.

Step One:
Drawing on unglazed ware

Step Two:
Glaze evenly

Step Three:
High temperature firing ceramic

Step Four:
Appreciate your work
