

So you got two sides, 4 shelves and two frames (front and back)

Step 1. Put the shelf in the side part and fix it with the little rounds.

Then do the same with the other shelves (one by one)

I recommend using the rubber mallet to make all the connections tight.

Step 2. Put the other side part and fix all the connections.

Step 3. Put the front frame on and fix the connections.

Step 4. Do the same for the back frame.
