

You can assemble that shelf two ways:

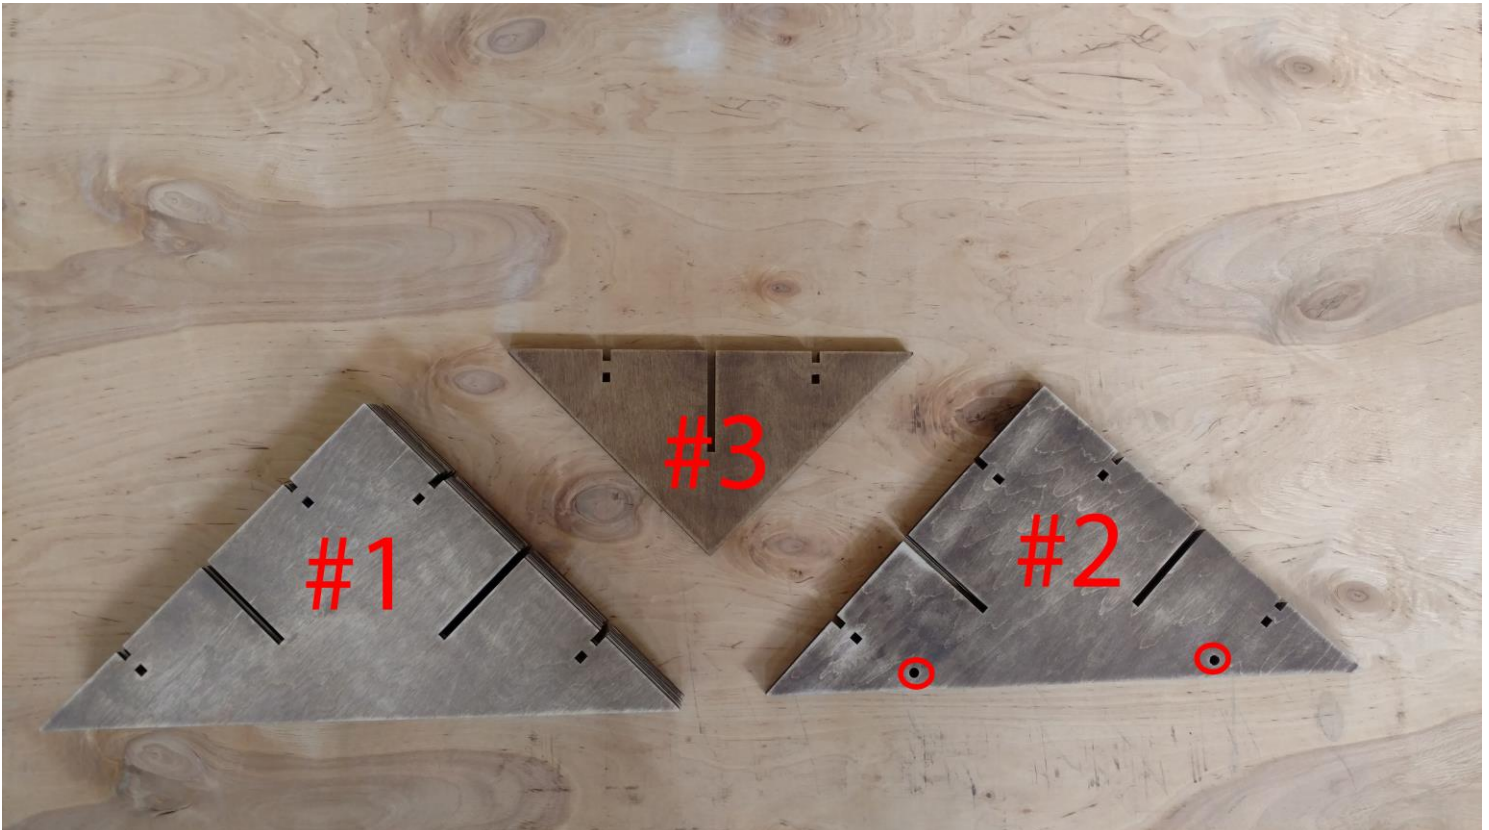

Standart

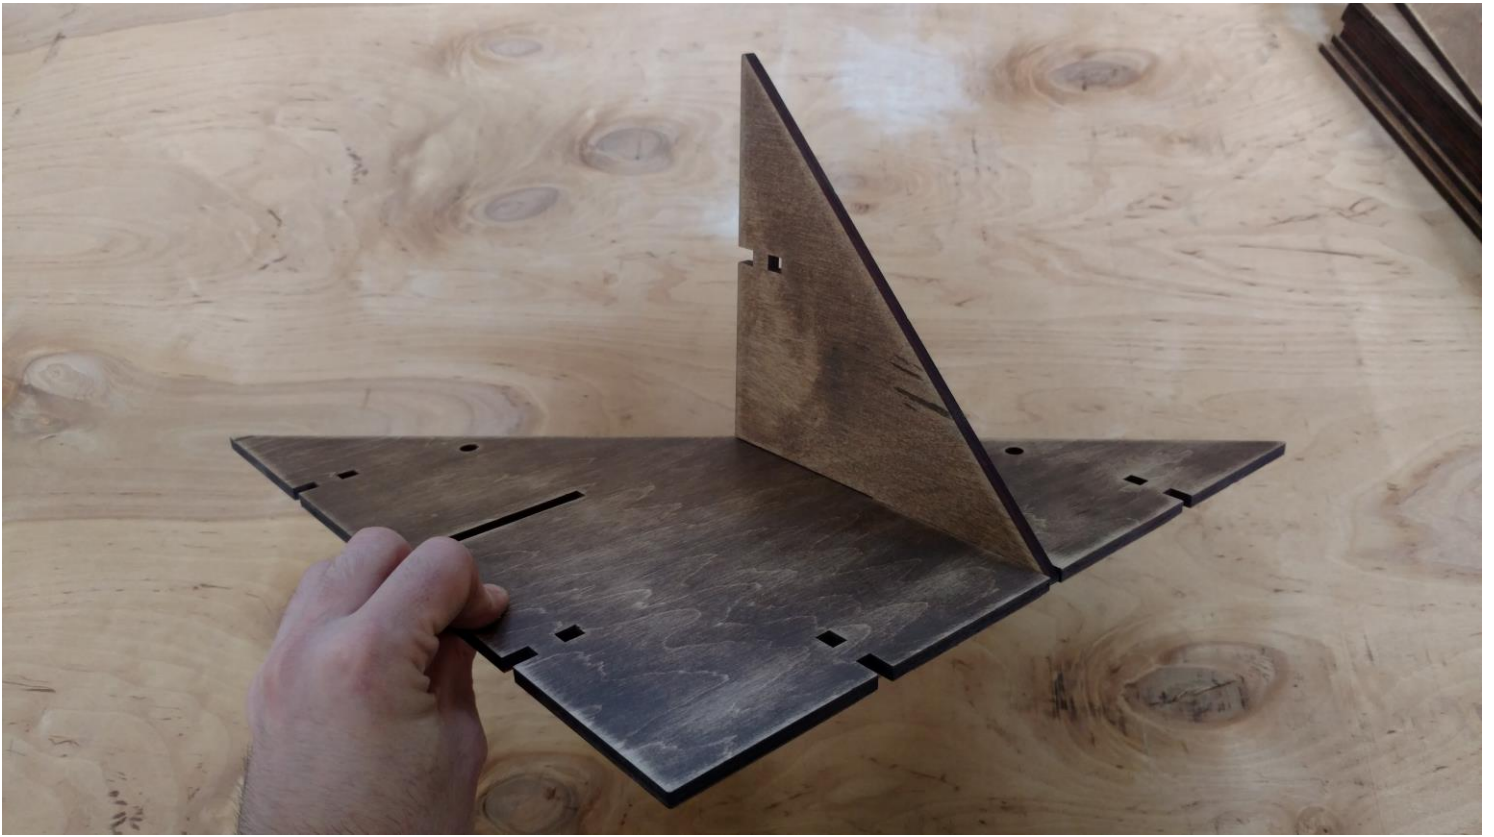

Z-type

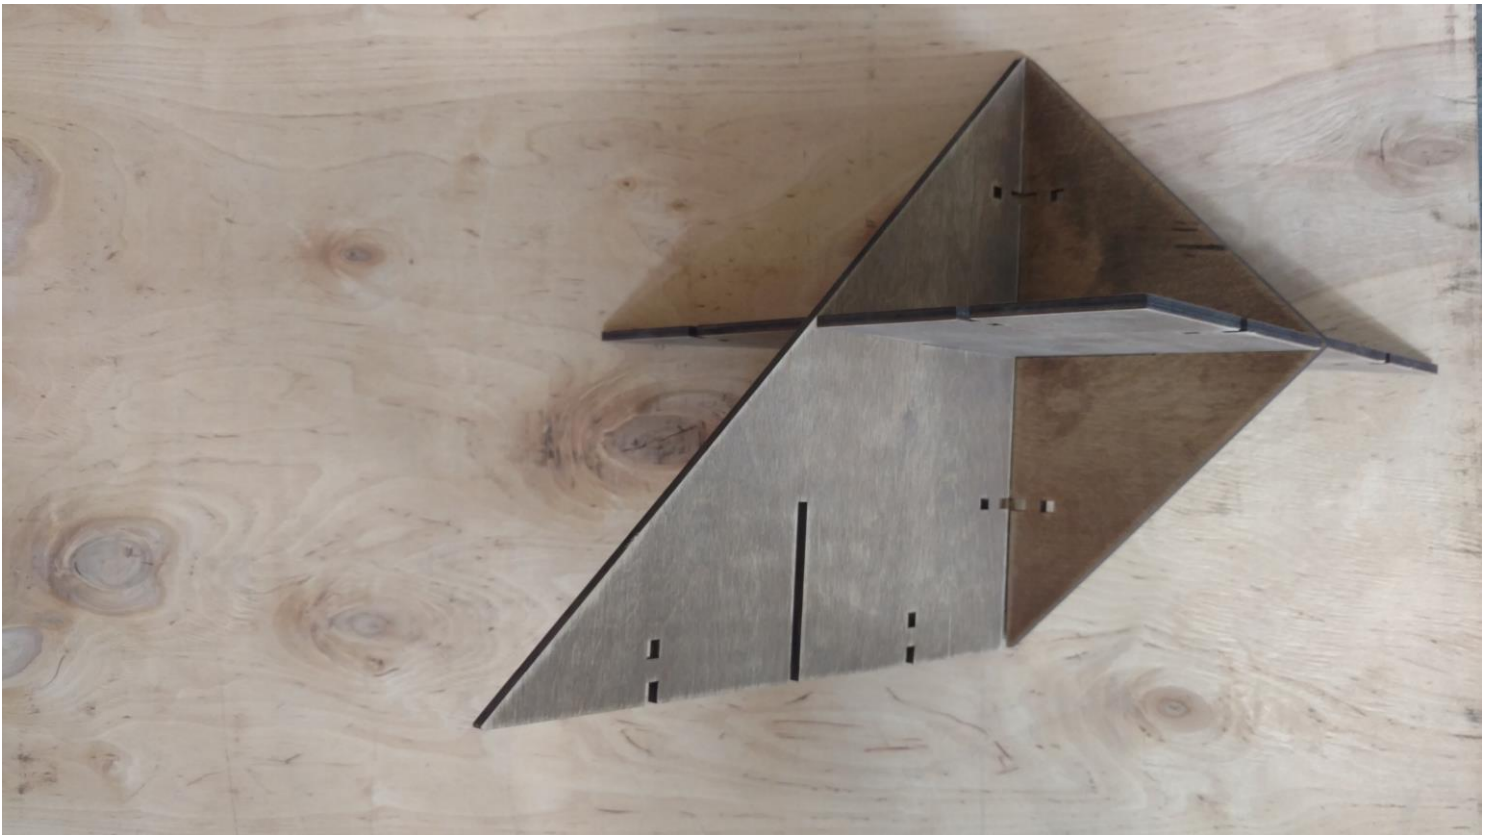

So you have 10 large triangles without round holes (**Part#1**),
3 large triangles **WITH** round holes (**Part#2**) and two small
triangles (**Part#3**)

Step 1. Take **Part#2** and **Part#3** and connect them like on a picture:

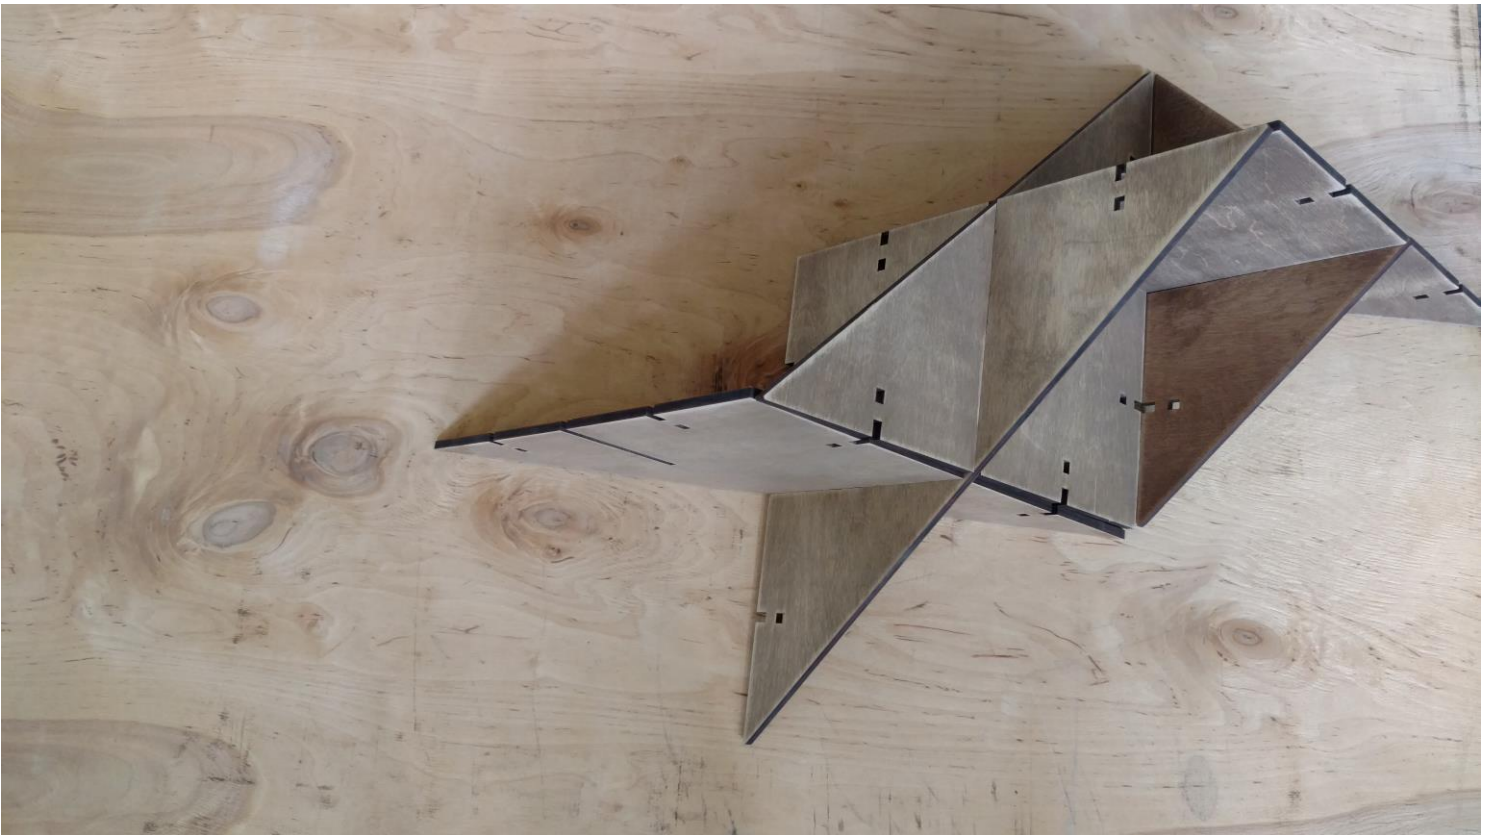

Step 2. Add **Part#1** from the left side

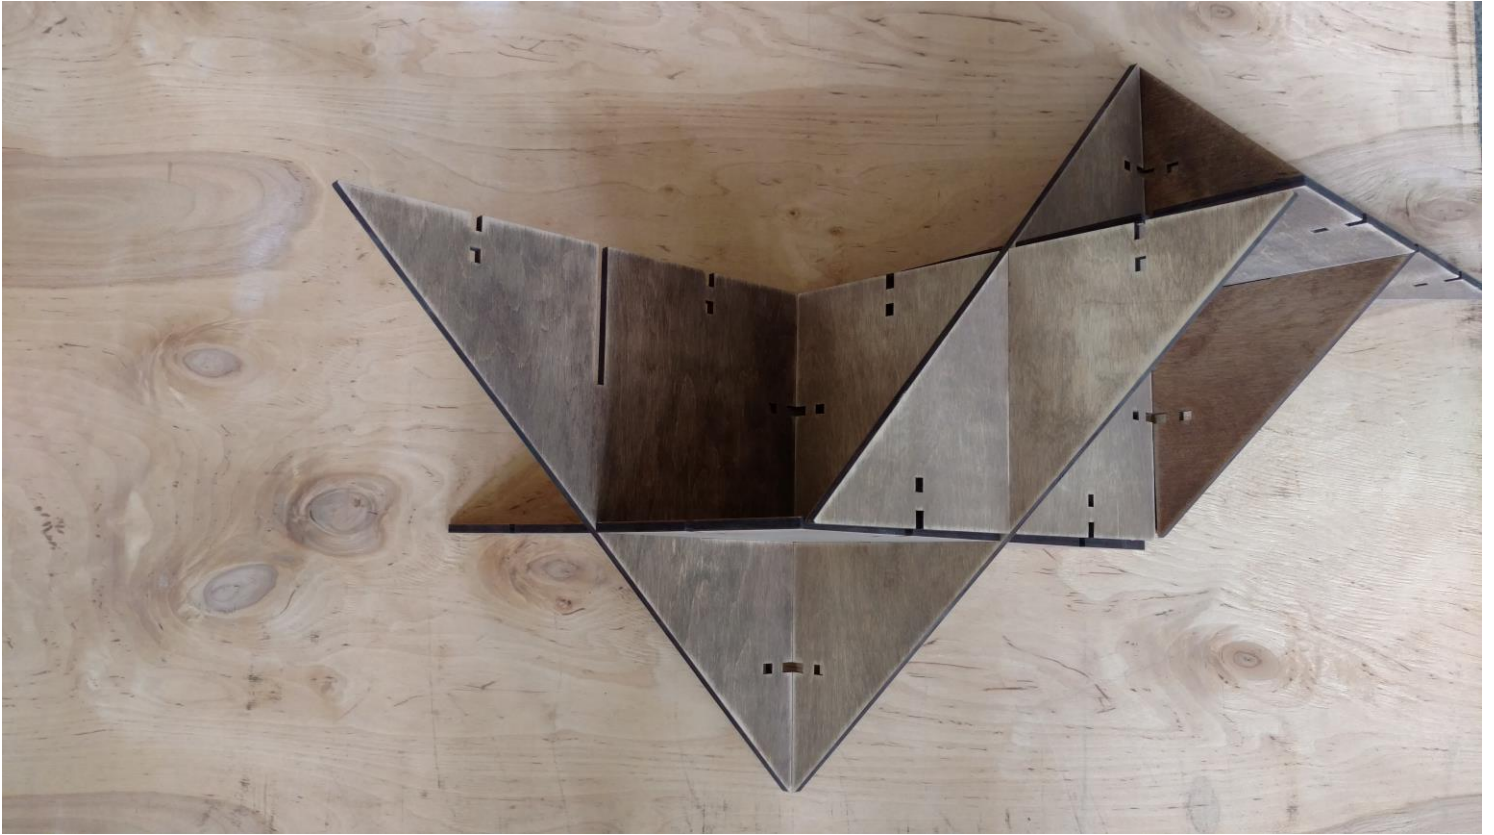

Step 3. Add another Part#1 from the bottom

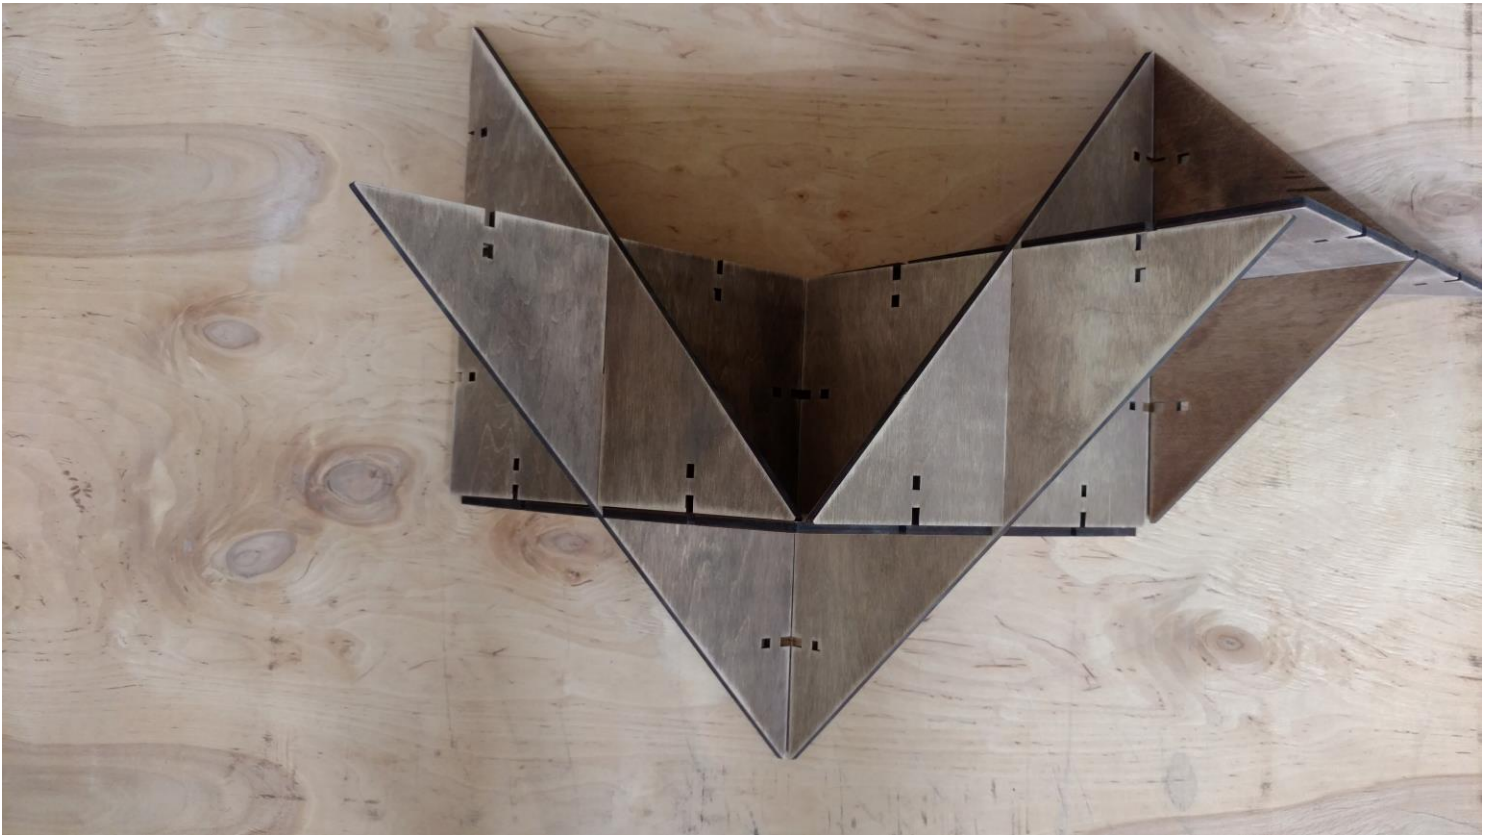

Step 4. Add another Part#1 from the left side

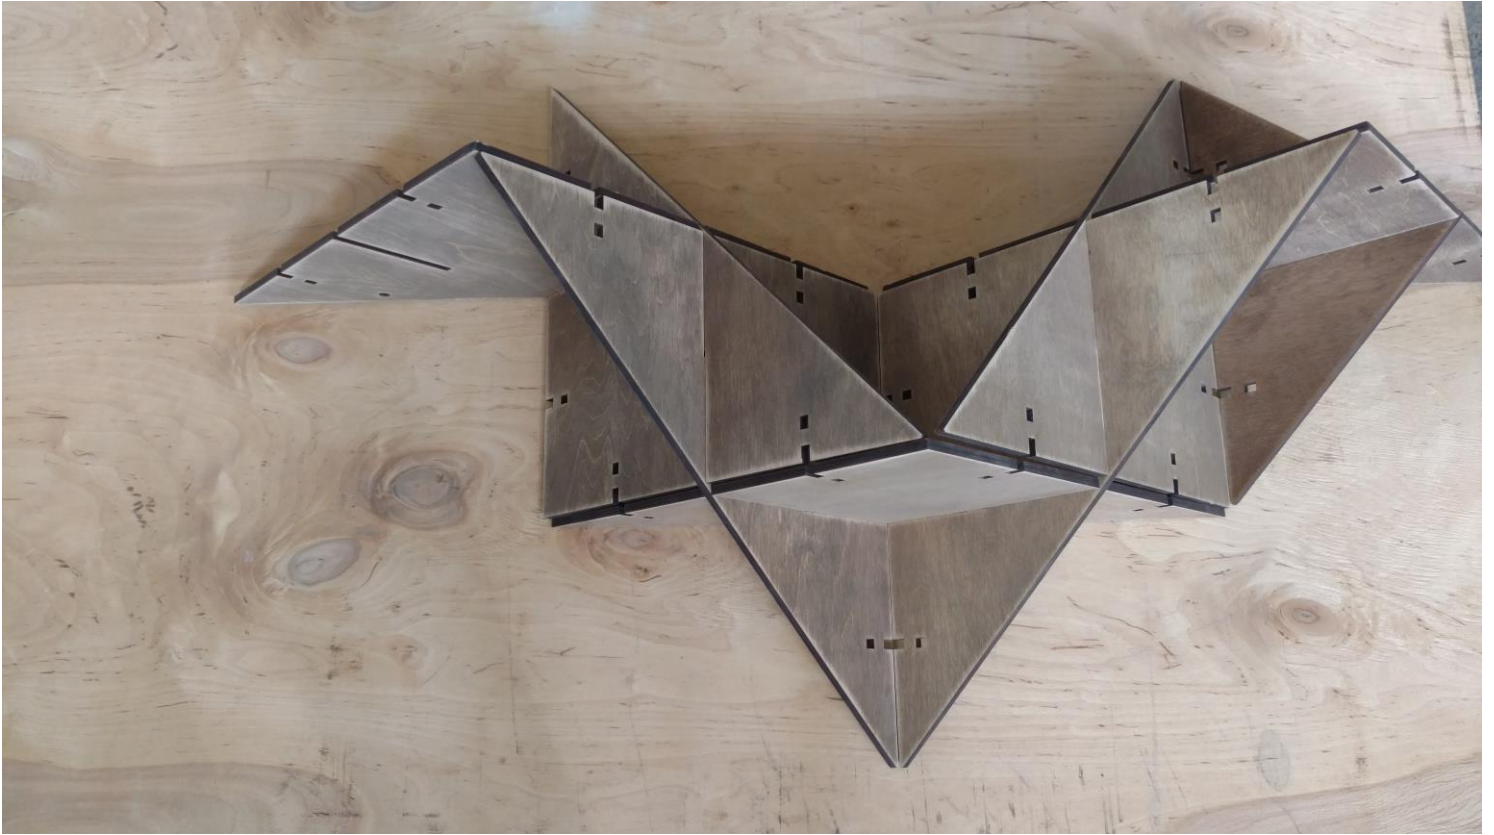

Step 5. Add another Part#1 from the left side

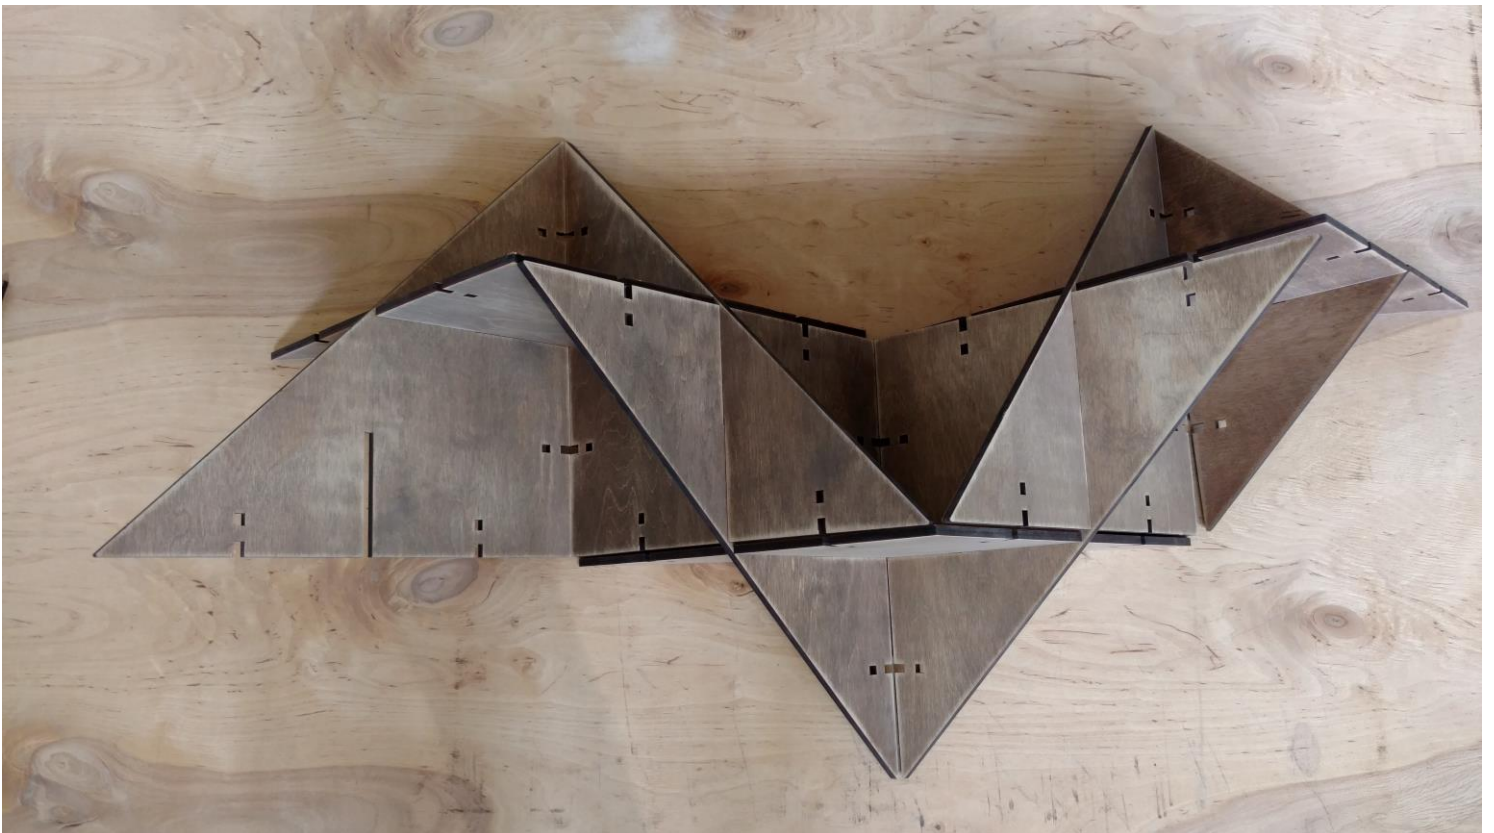

Step 6. Add another Part#1 from the top

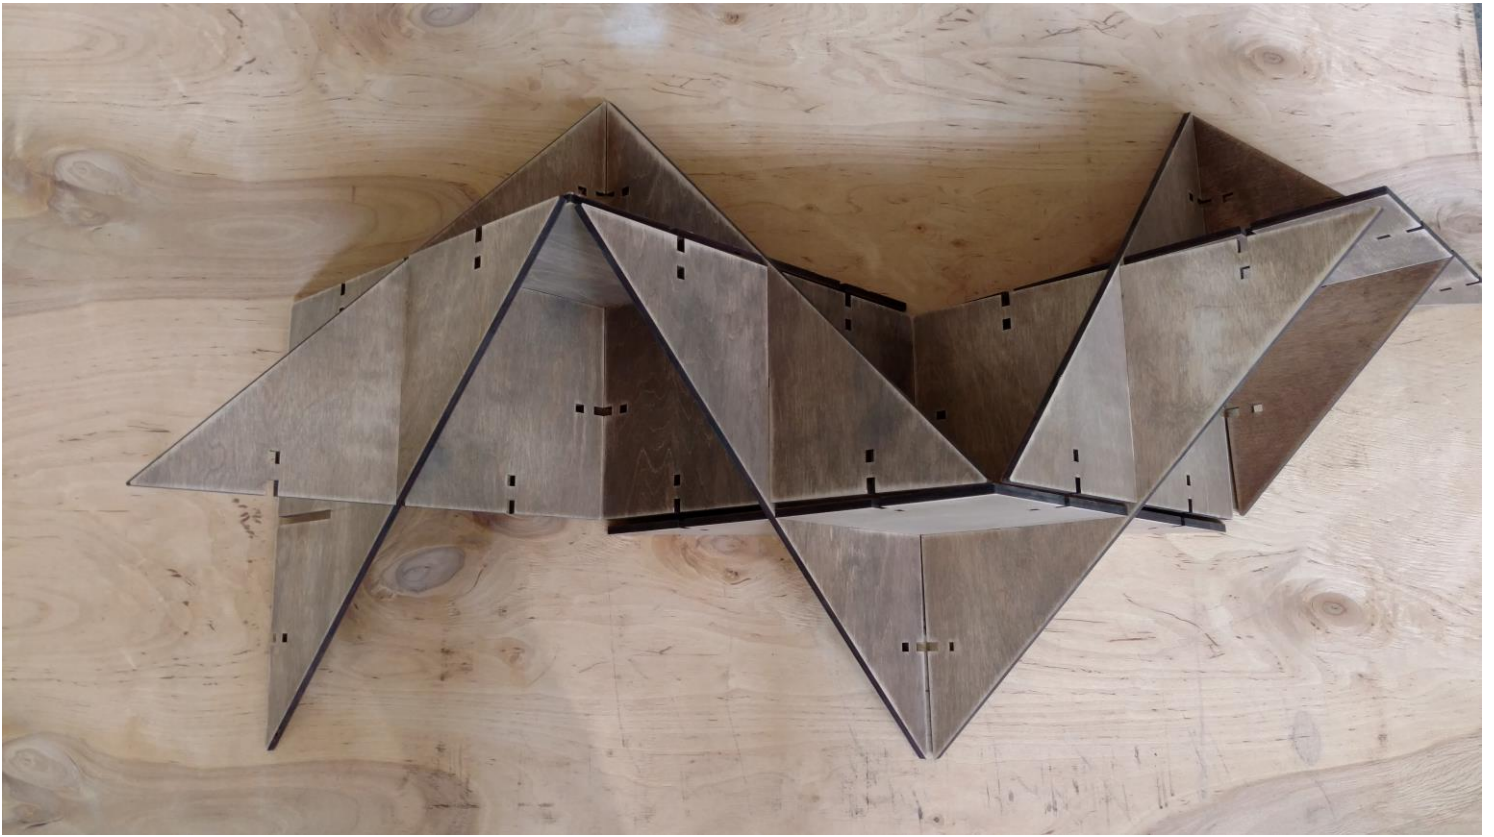

Step 7. Add Part#2 (with round holes) from the left side

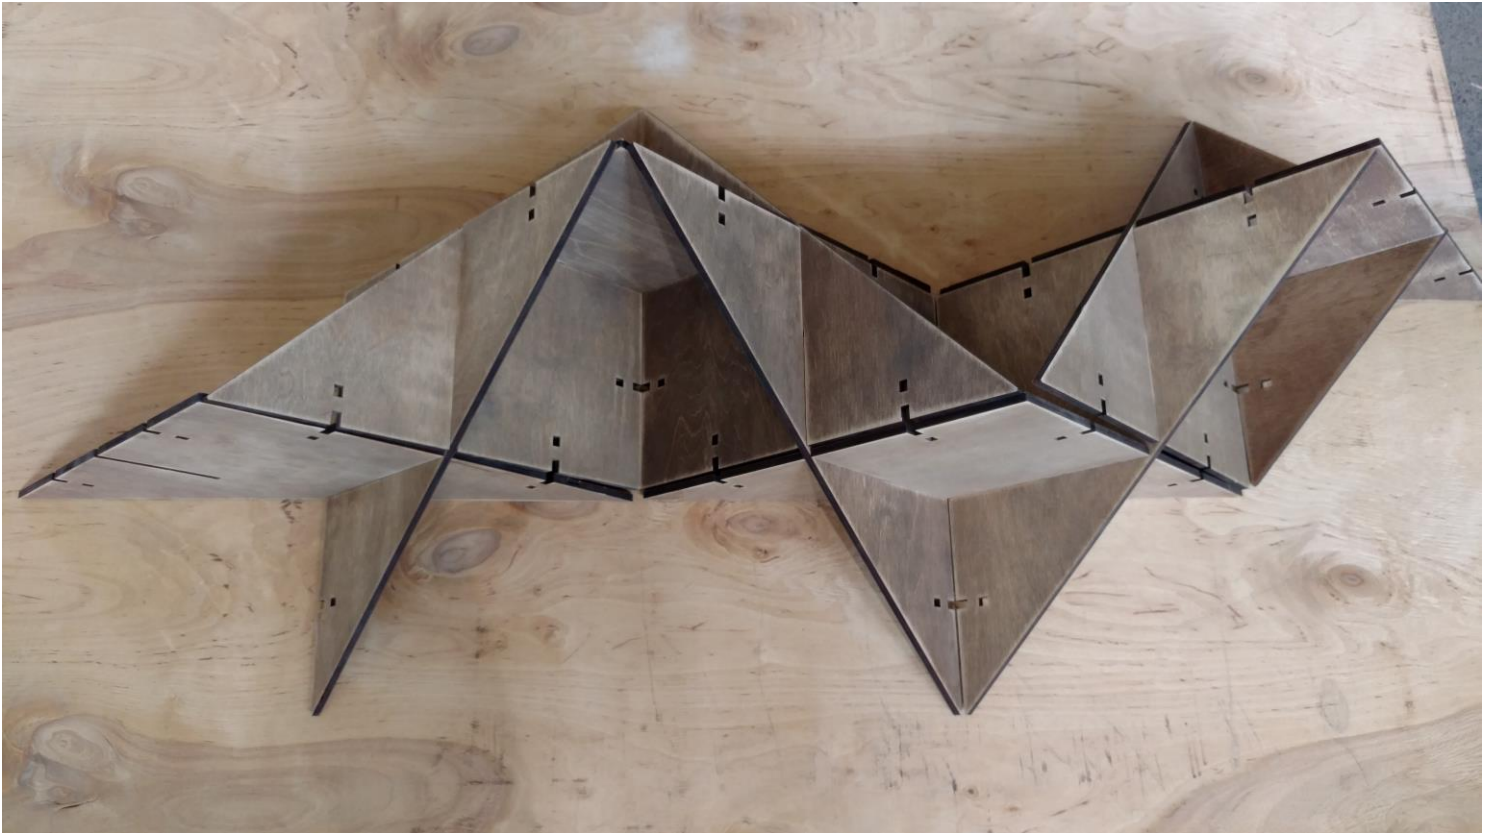

Step 8. For assembling **Standart shelf – add Part#1 from the left**
For assembling **Z-type shelf – please proceed to the Step 15(Page9)**

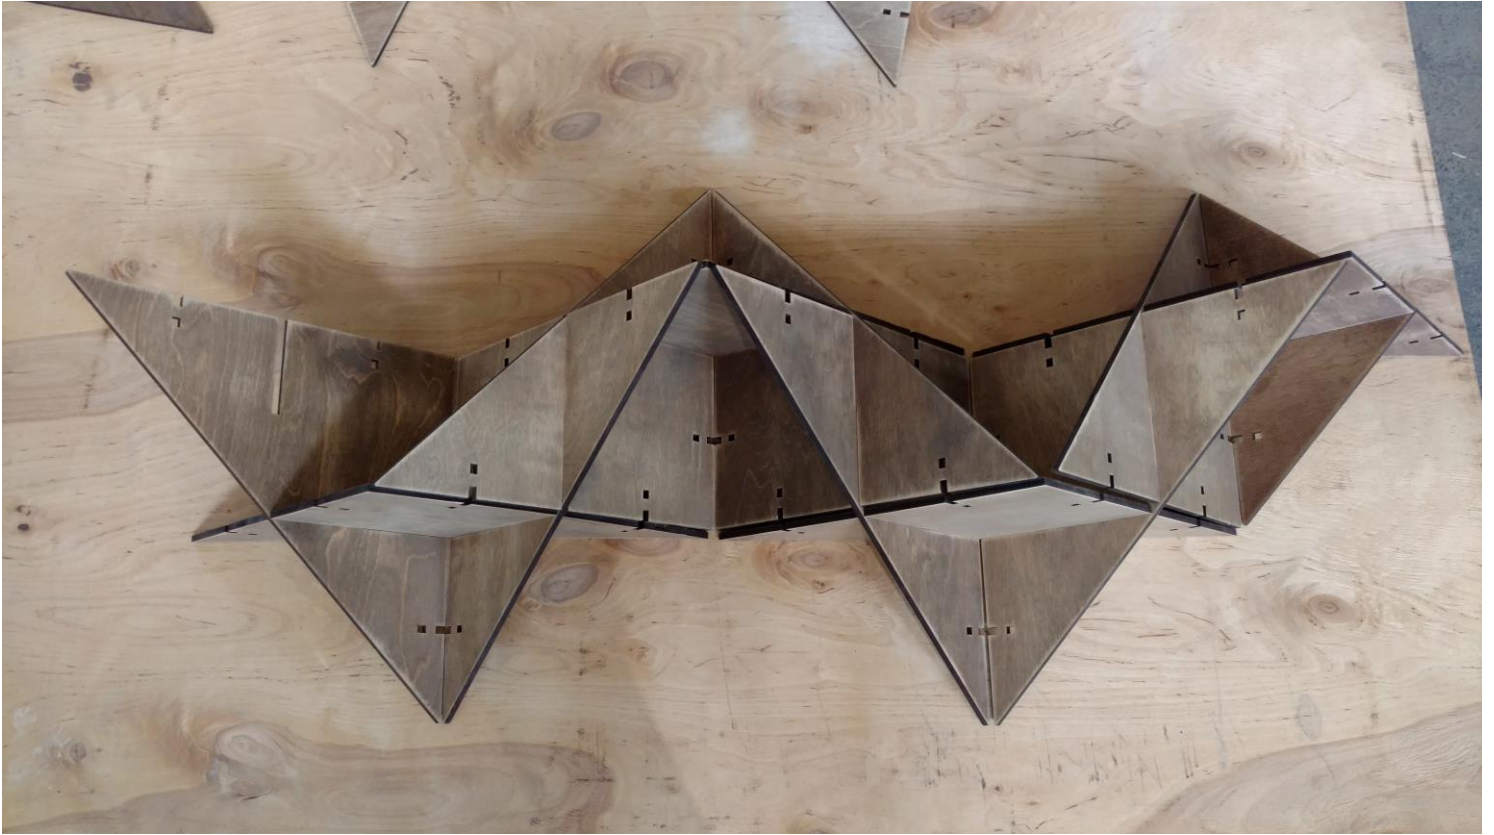

Step 9. Add another Part#1 from the bottom

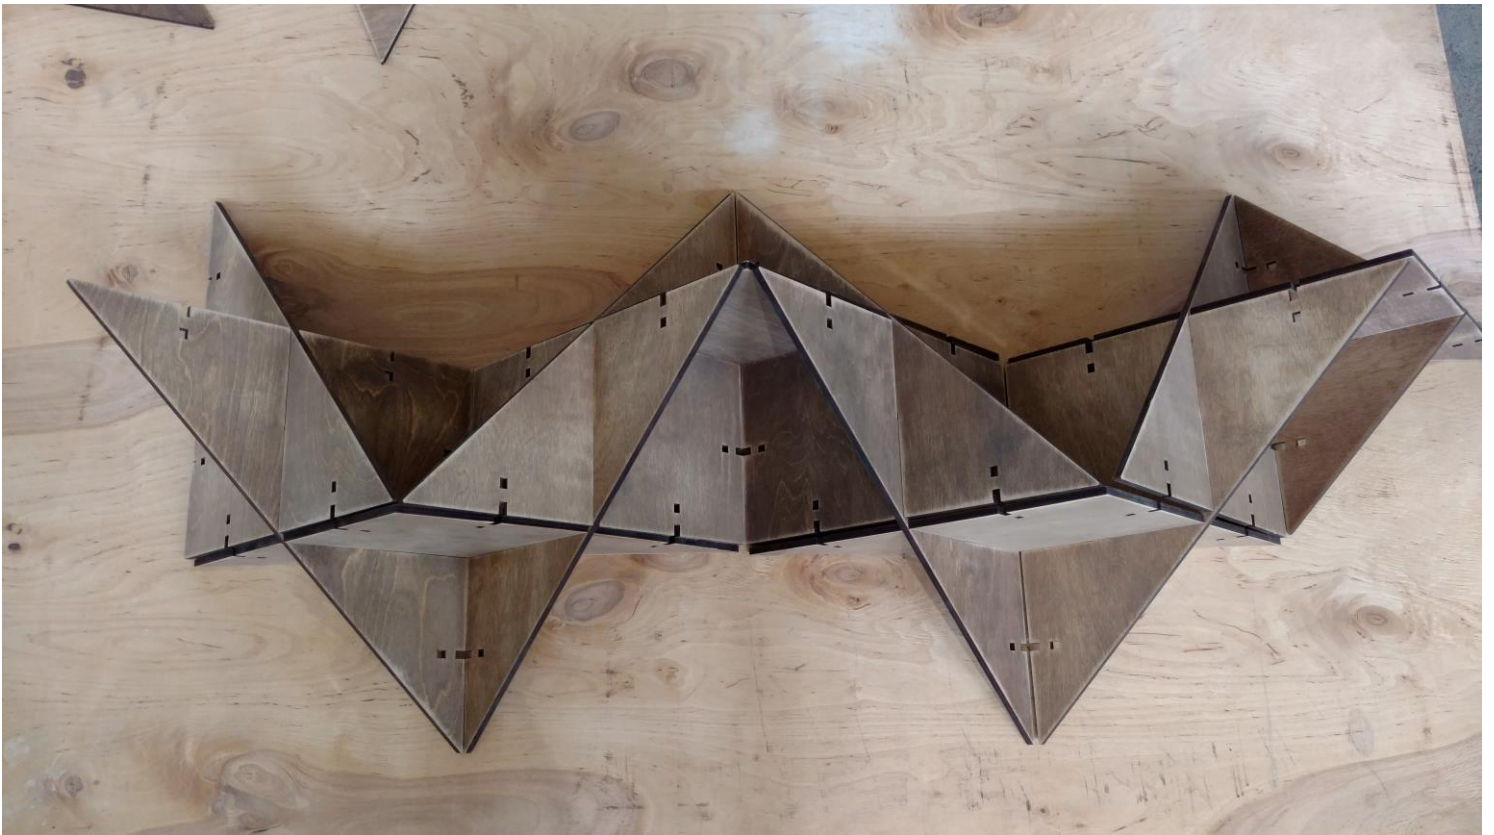

Step 10. Add another Part#1 from the left side

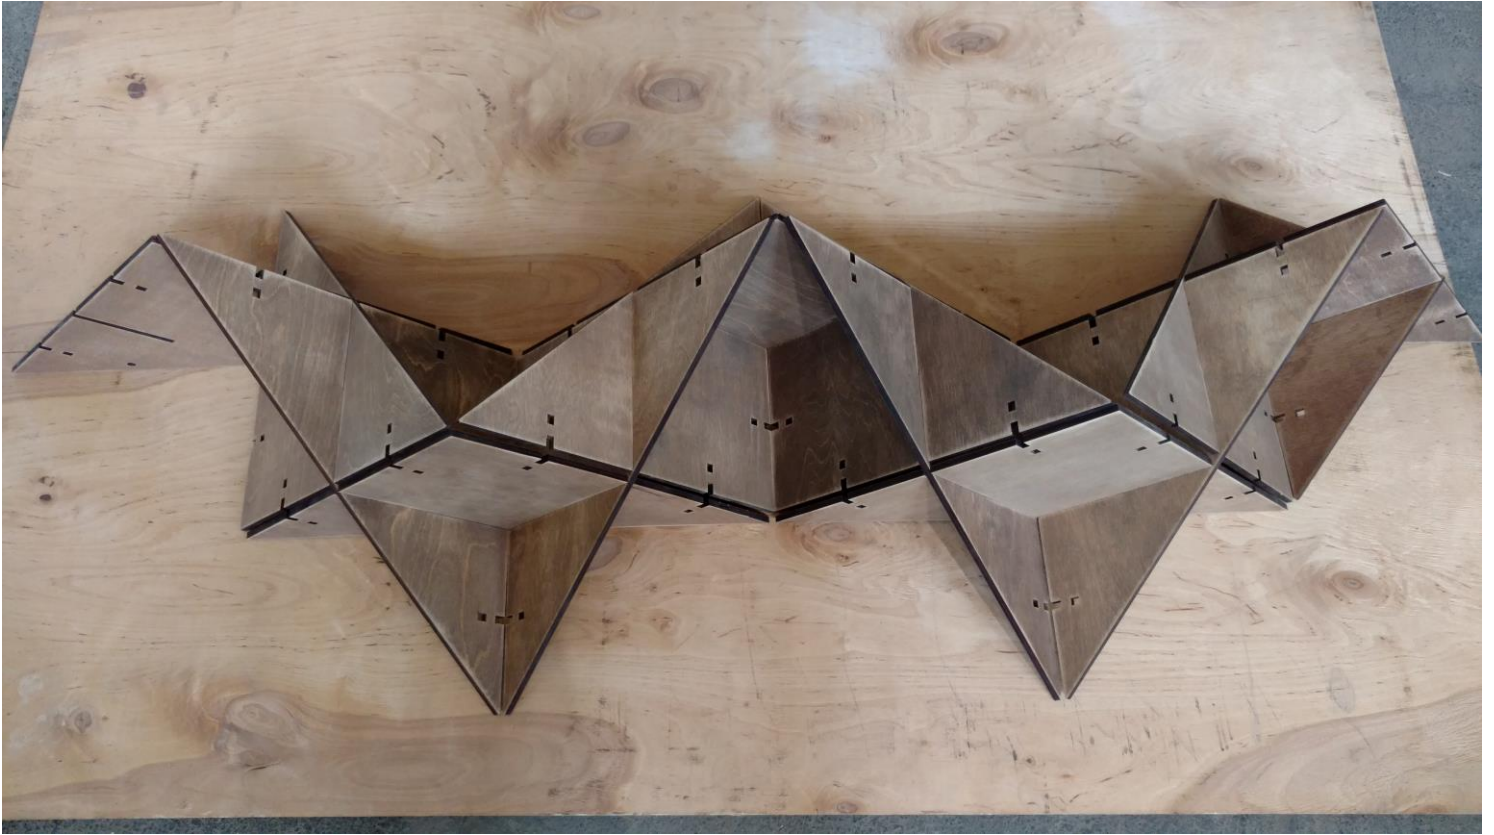

Step 11. Add another Part#1 from the left side

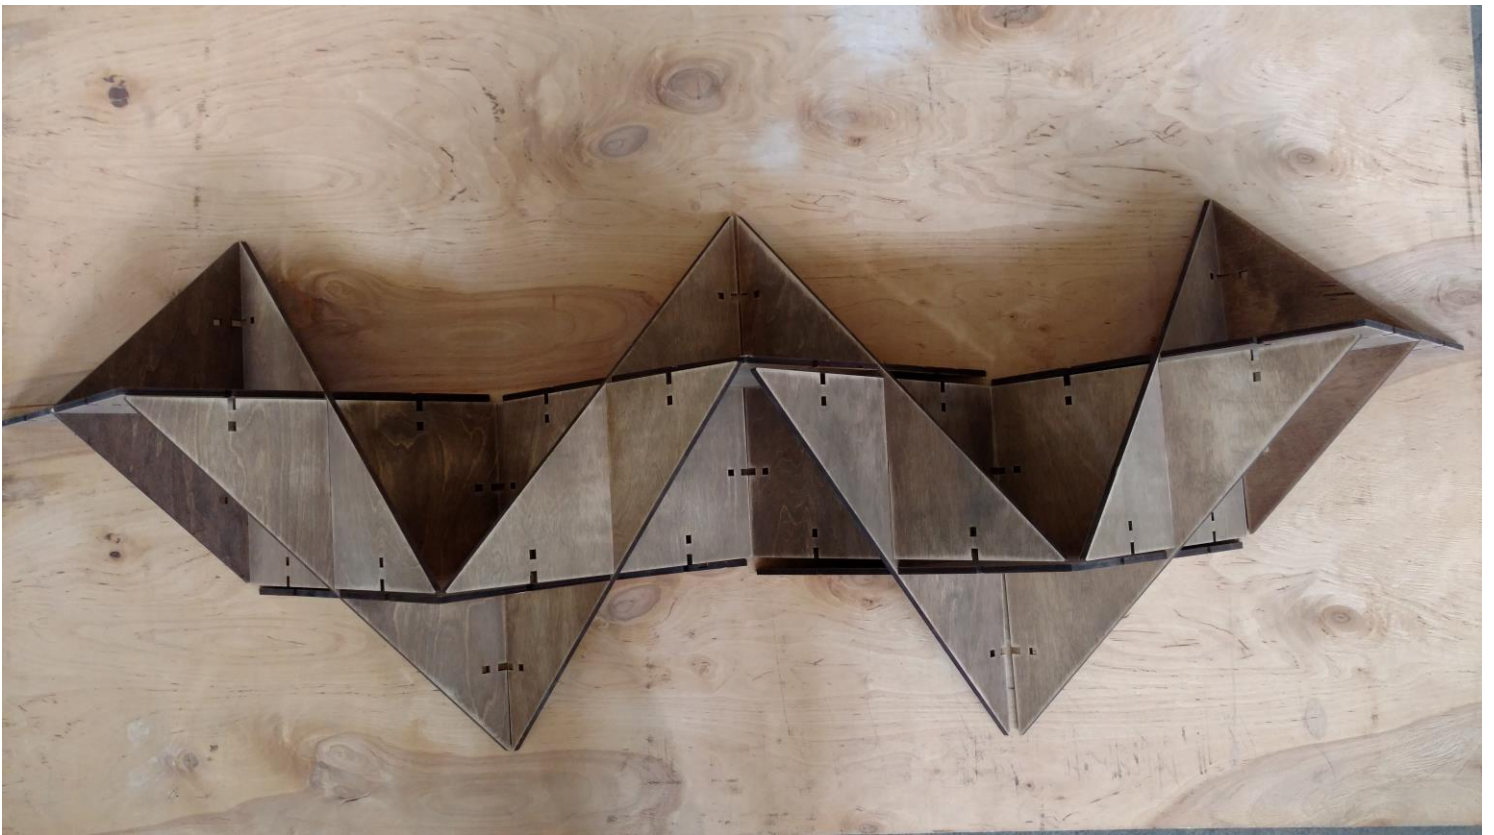

Step 12. Add another Part#1 from the top

Step 13. Add **Part#2** from the left side

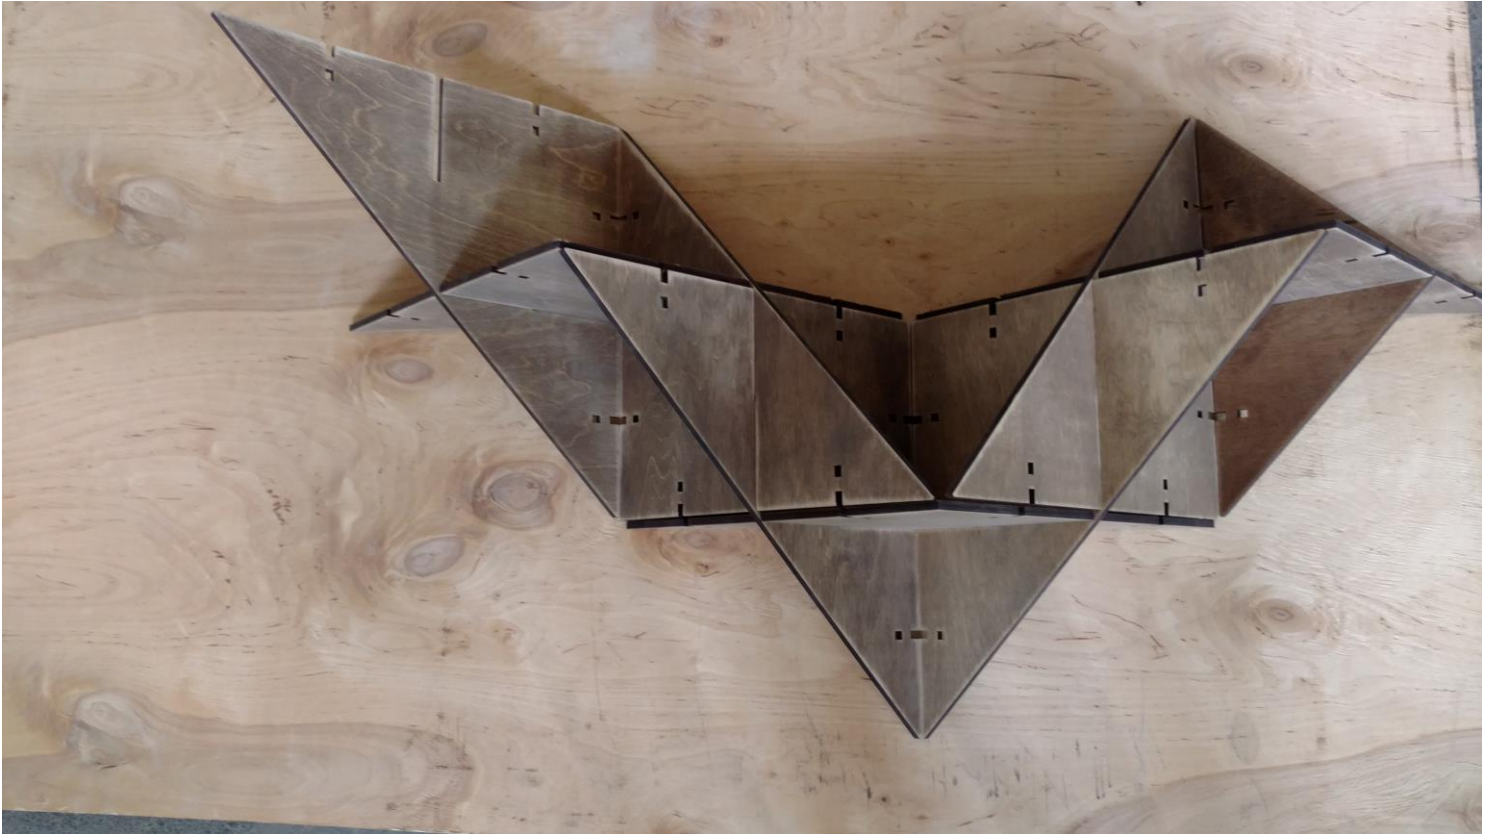

Step 14. Add the last **Part#3** from the left side

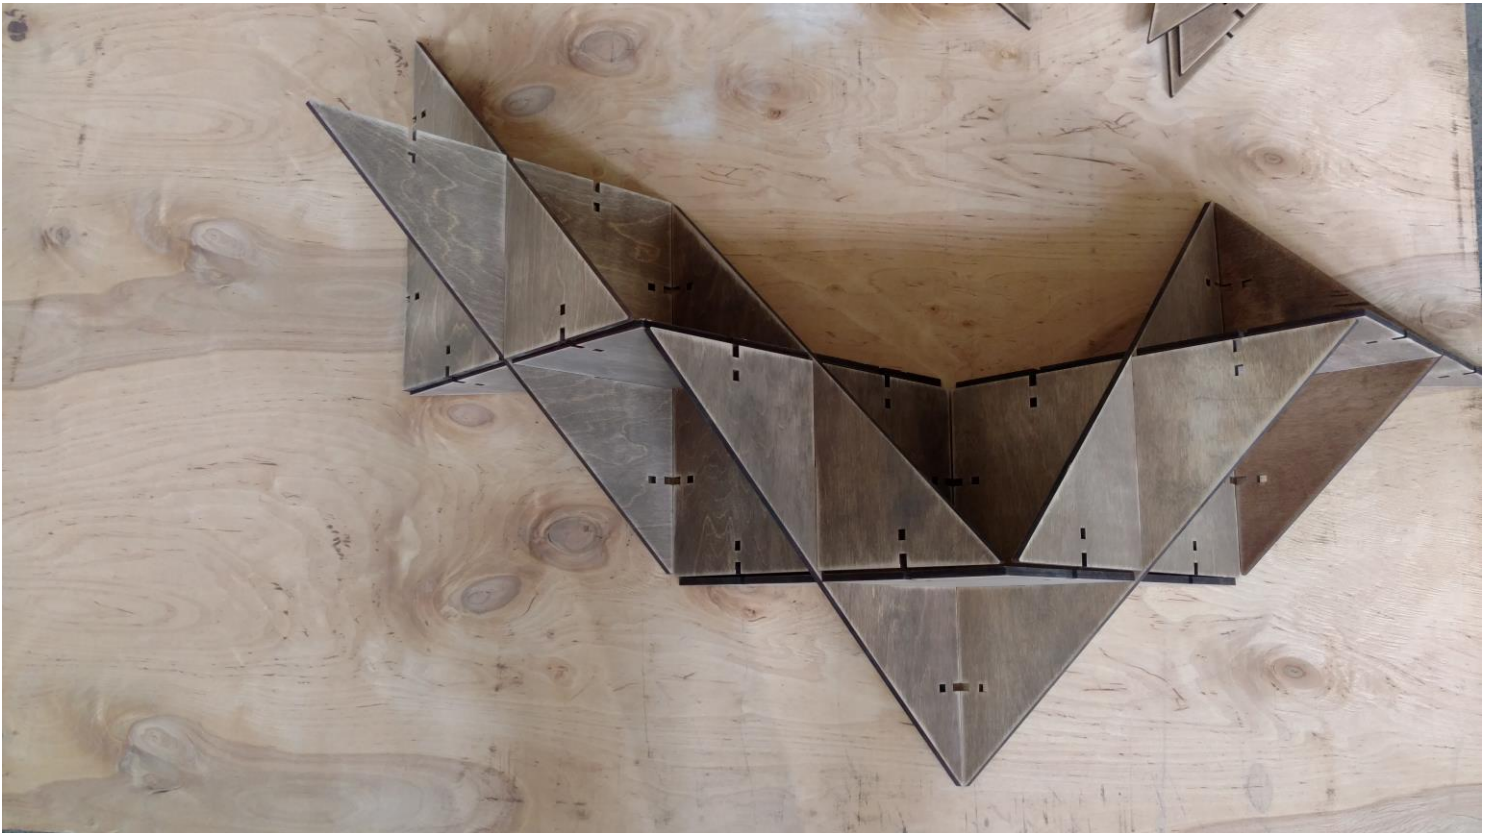

For the connections-guide please proceed to the [Step 22 \(Page 13\)](#)

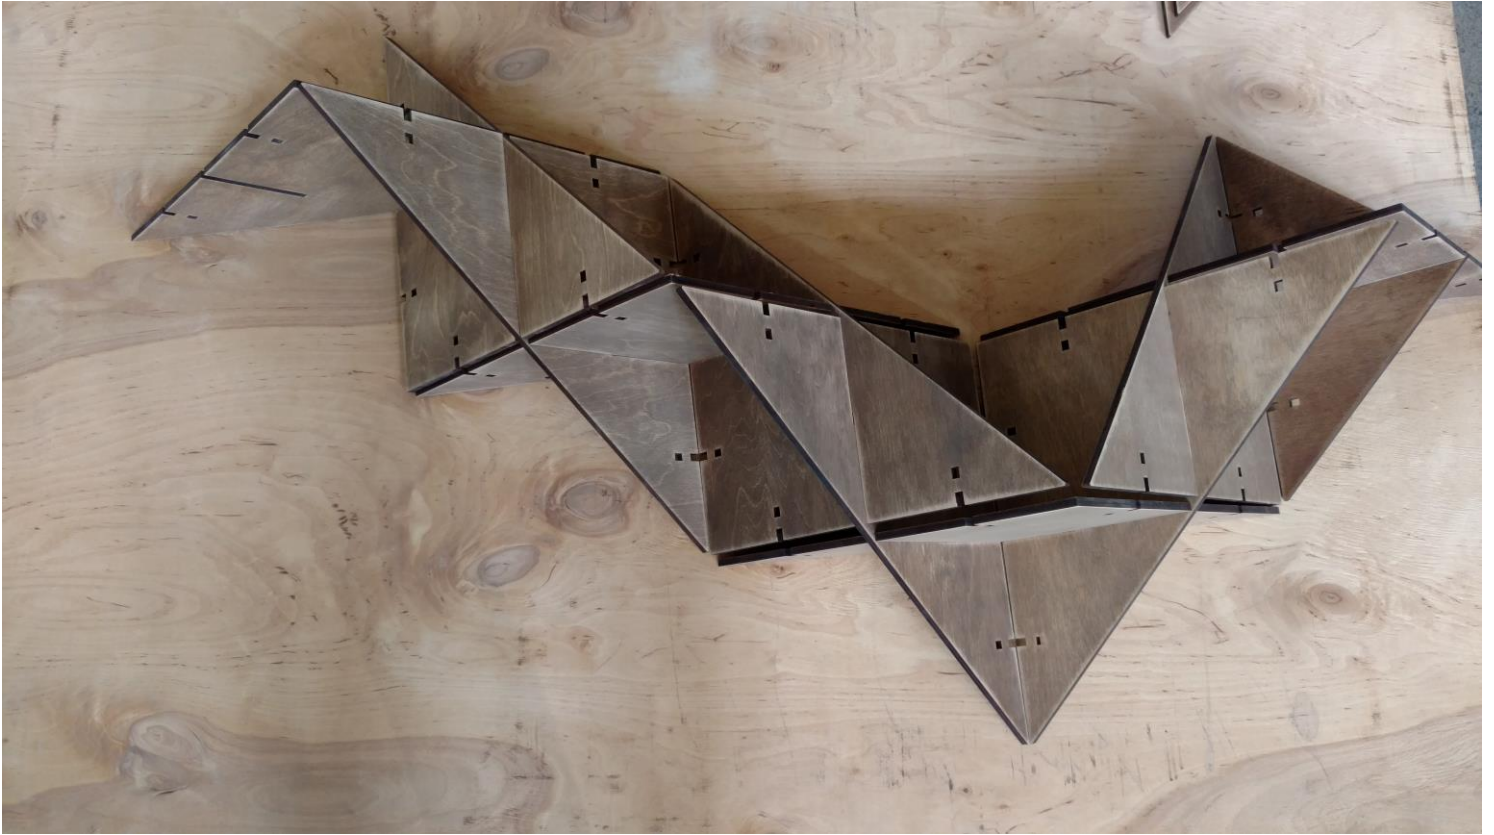

Step 15. (Z-type shelf) Add the Part#1 from the left side

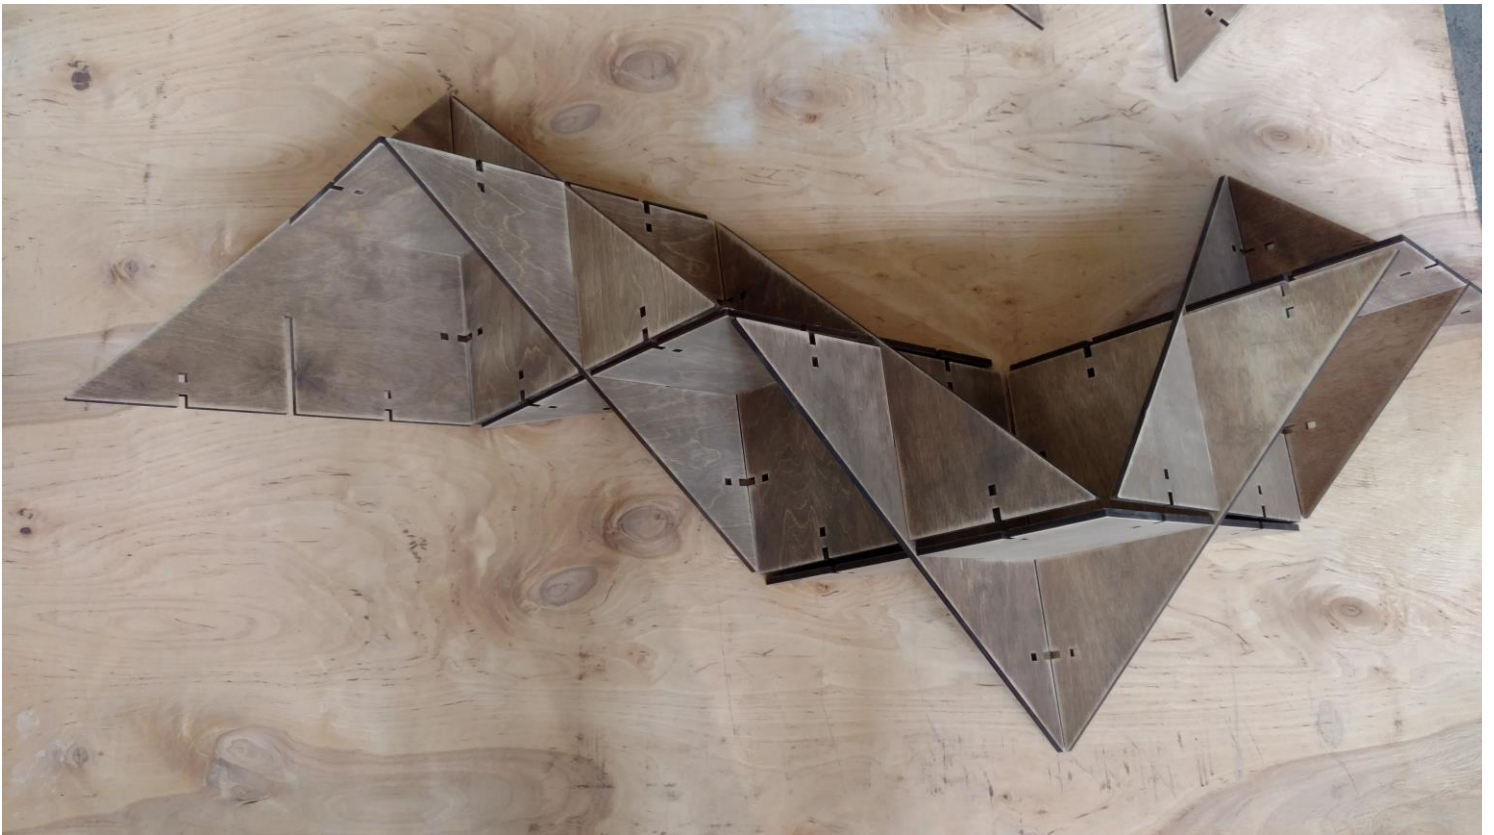

Step 16. (Z-type shelf) Add another Part#1 from the top

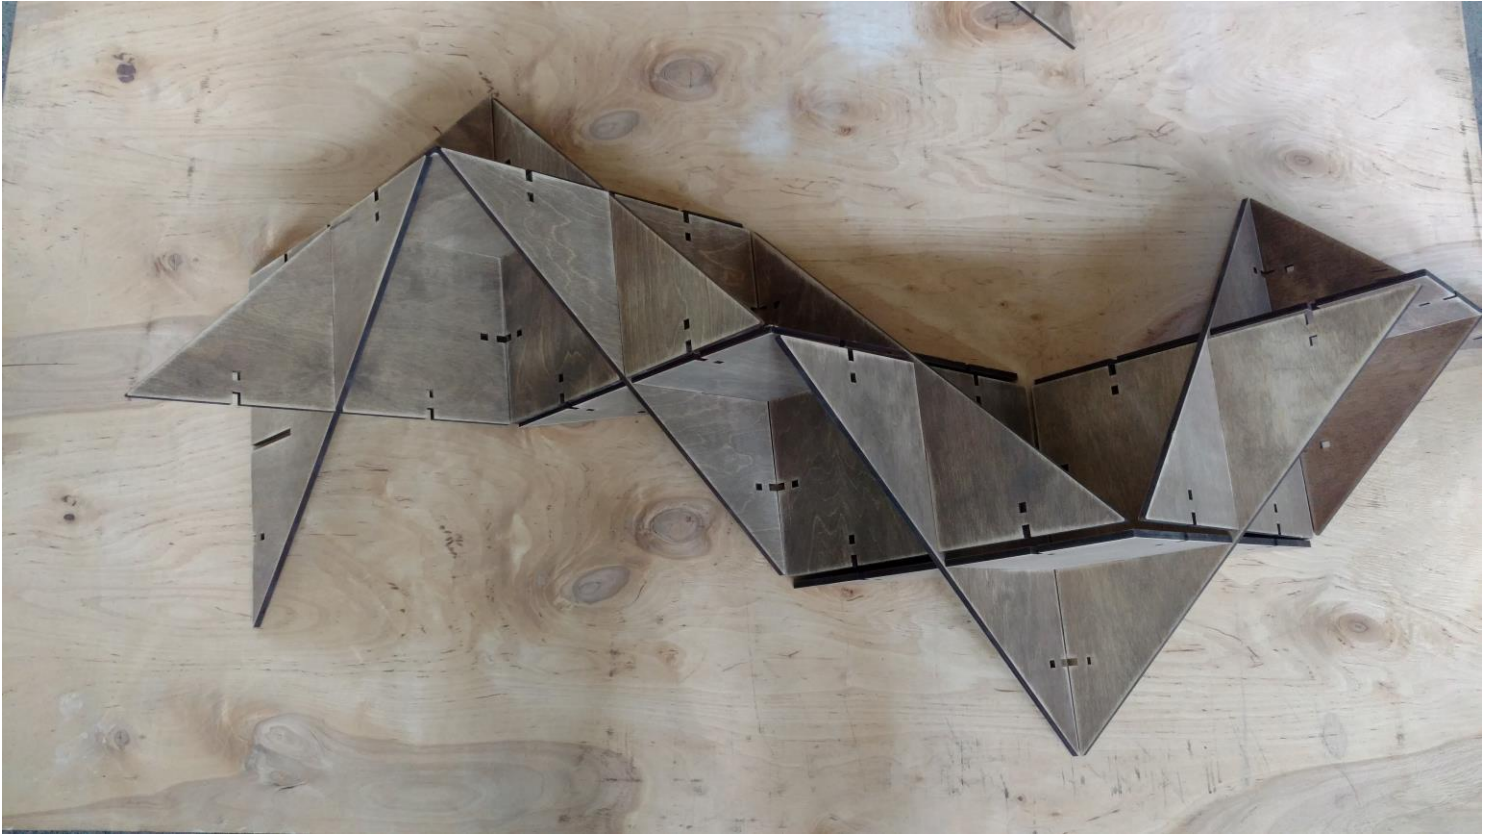

Step 17. (Z-type shelf) Add another Part#1 from the left side

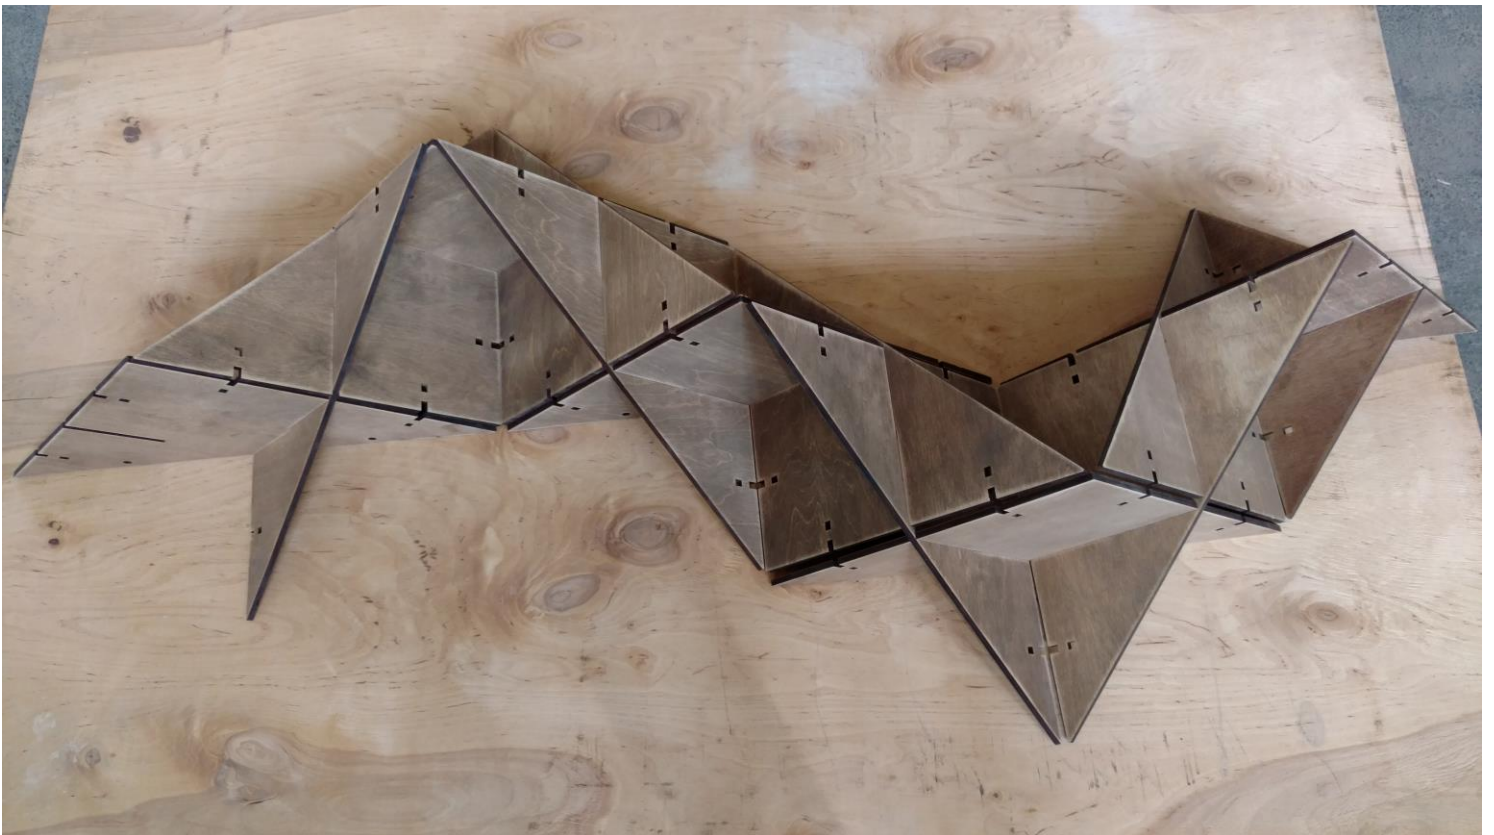

Step 18. (Z-type shelf) Add another Part#1 from the left side

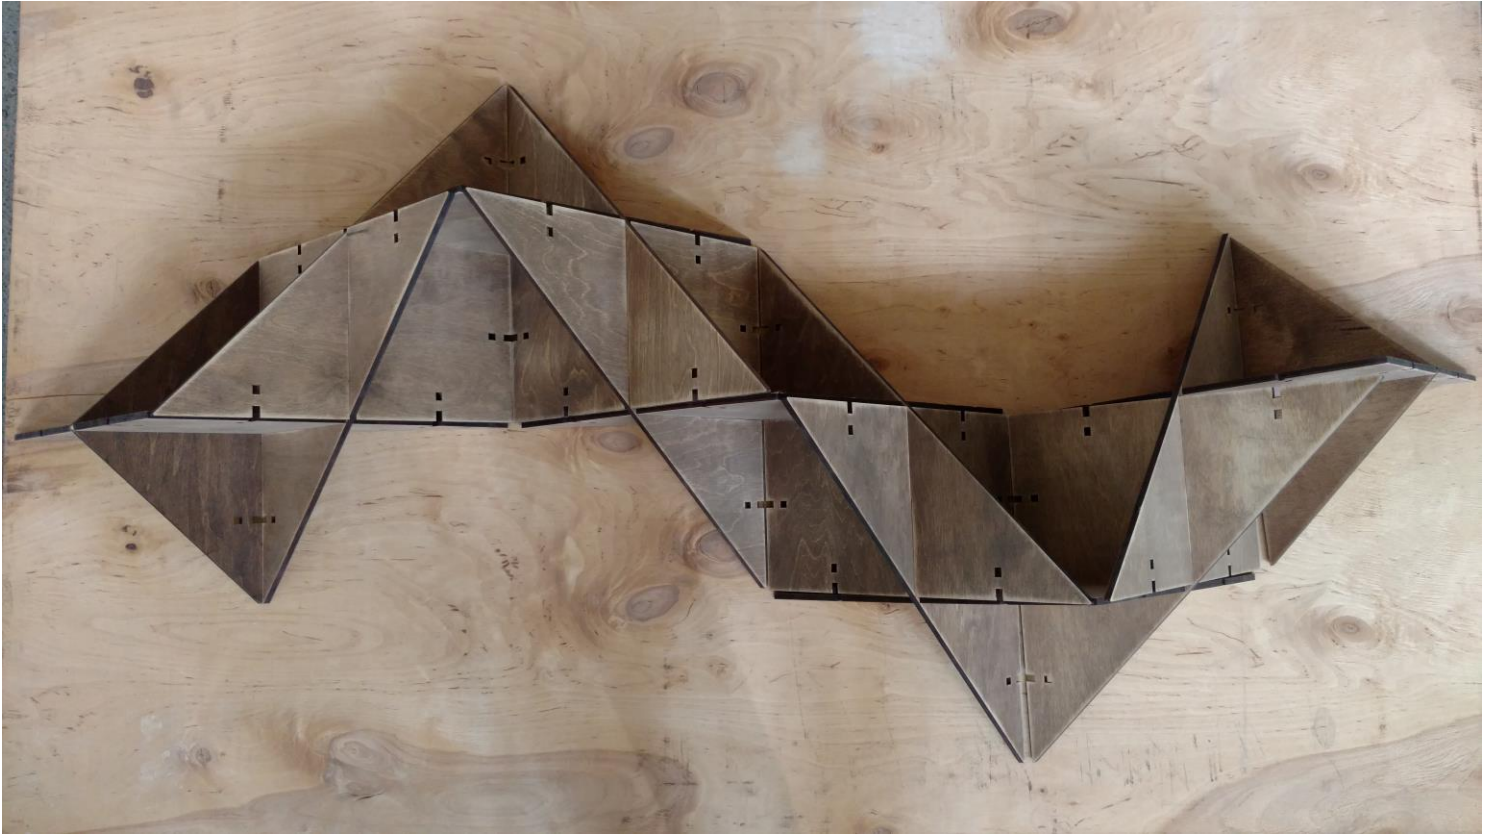

Step 19. (Z-type shelf) Add another Part#1 from the bottom

Step 20. (Z-type shelf) Add Part#2 from the left side

Step 21. (Z-type shelf) Add the last Part#3 from the left side

For the connections-guide please proceed to the Step 22 (Page 13)

Step 22. Now it's time to connect all the triangles with provided wooden fastenings.

Take the “mother” connector and place it like that:

Then take the “father” connector and push it in, holding the “mother” connector from the other side. Repeat for all.

Then put the plugs on all the connection-free grooves

The wooden bars are simple hole-markers. Just connect them like that and map the holes on your wall. (Please, notice that you need only 6 small holes, the large hole in the middle is just for center your shelf) The mounting planks should be taken off the wall before hanging the shelf. Use 8mm drill and provided hooks and dowels for wall mounting.
