

So there are three kind of parts: five large triangles without round holes (left), two large triangles with round holes (center), and two small triangles (right)

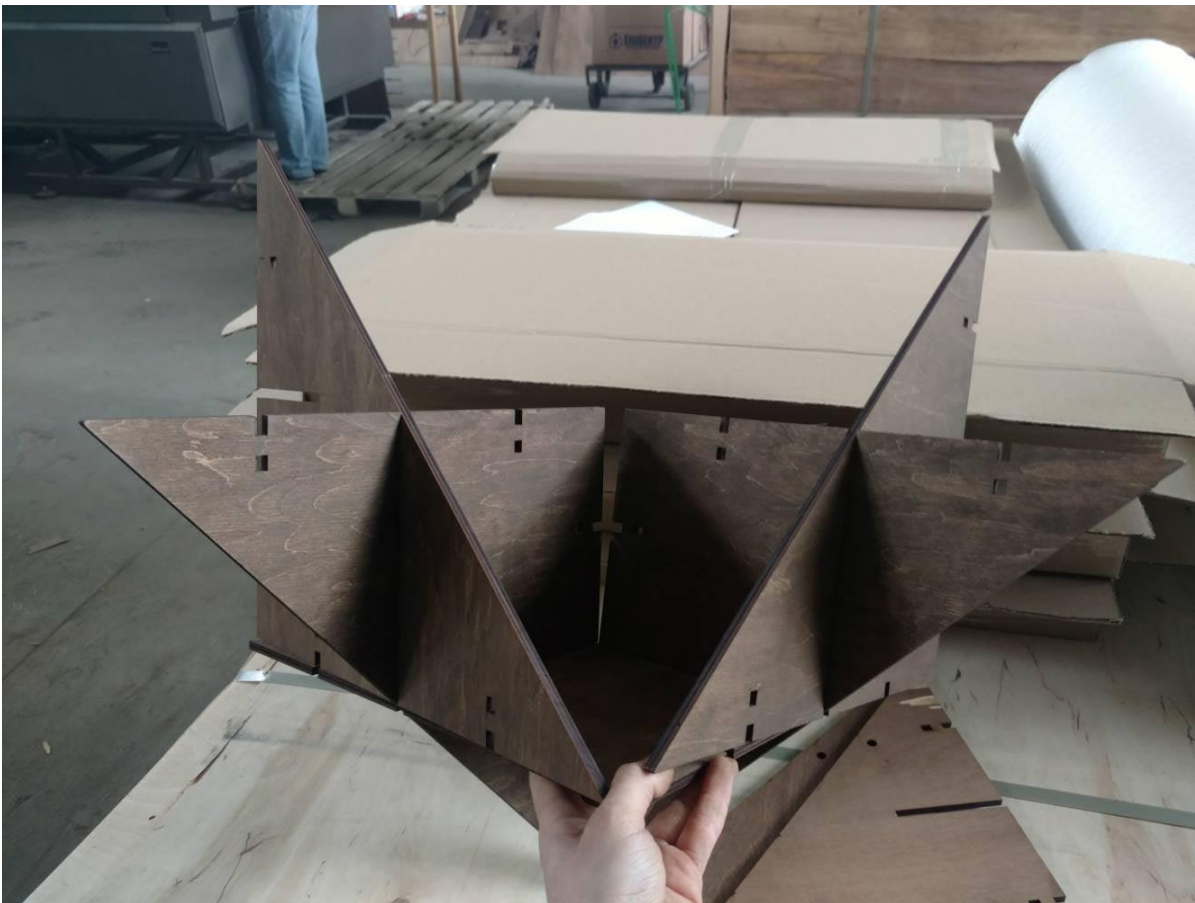

Step 1. Take two large triangles without round holes and connect them like on the picture below.

Step 2. Add another one large triangle on top.

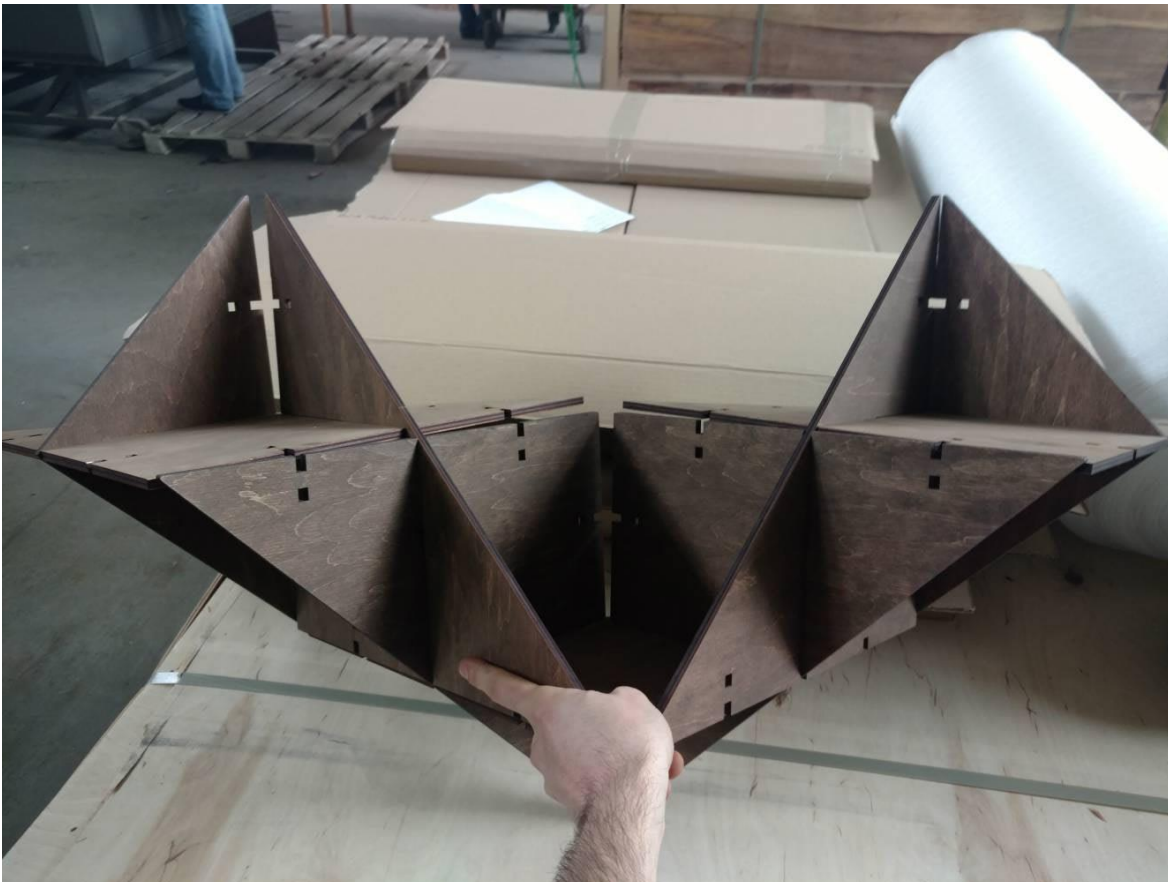

Step 3. Repeat those steps from the other side to get that:

Step 4. Take two large triangles WITH round holes and place them horizontally from the both sides.

Step 5. Connect the small triangles from the both sides.

Step 6. Now it's time to connect all the triangles with provided wooden fastenings.

Take the “mother” connector and place it like that:

Then take the “father” connector and push it in, holding the “mother” connector from the other side. Repeat for all.

Then put the plugs on all the connection-free grooves

The wooden bars are simple hole-markers. Just connect them like that and map the holes on your wall. Use provided hooks and dowels for wall mounting.
