

So there are three kind of parts: four large triangles without round holes (left), one large triangle with round holes (center), and two small triangles (right)

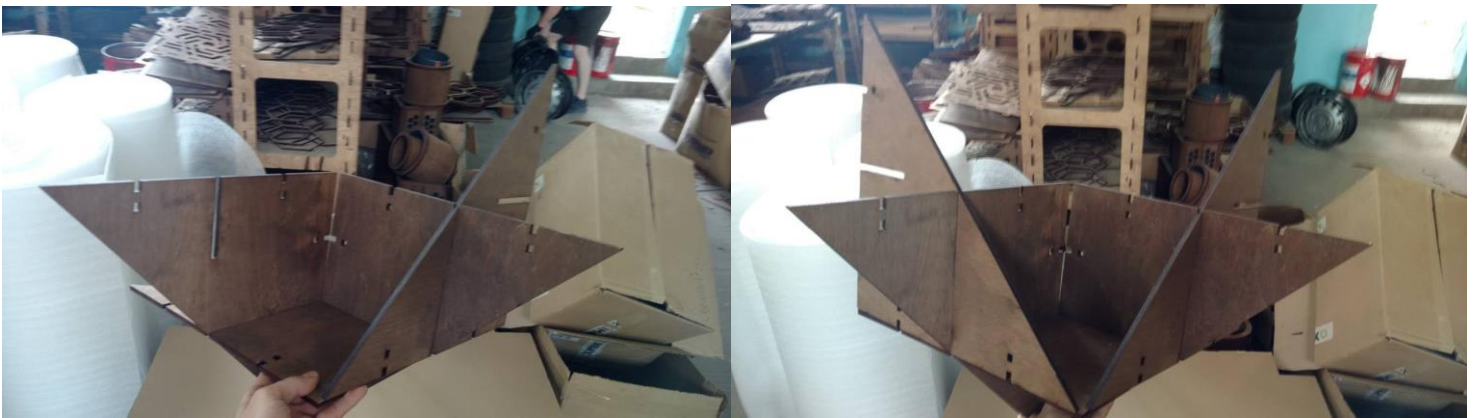

Step 1. Take large triangle **WITH** round holes (horizontally) and connect large triangle like on the picture below.

Step 2. Add another one large triangle from the other side.

Step 3. Add another two large triangles like that:

Step 4. Add the small triangles:

Step 6. Now it's time to connect all the triangles with provided wooden fastenings.

Take the “mother” connector and place it like that:

Then take the “father” connector and push it in, holding the “mother” connector from the other side. Repeat for all.

Then put the plugs on all the connection-free grooves

The wooden bar is a simple hole-marker. Map the holes on your wall and use provided hooks and dowels for wall mounting.
