

So you got two main frames, two shelves and two sides.

Step 1. Put the shelf in the side part like on picture.

Step 2. Use the wooden nails to fix it. You may use the rubber mallet to speed up the process.

Step 3. Install the second shelf. Then install the second side and fix all the connections.

Step 4. Put the main frame on top and fix all the connections. Then put the second frame and connect it.

Step 5. (Optional) You can use the plugs to hide the holes in sides. If you want to connect several units vertically – skip that step for now.

Put the plug and push the nail inside, holding it from the other side.

Step 6. (Optional) If you want to connect several units vertically, use the provided wooden bars and connectors.

Plug the clip, put on the bar and fix it with the nail. Stack the second unit and connect it to the bar.

Step 7. The final step is to put little hexagons on the wooden nails. Use the provided hooks and dowels for wall mounting.
