

BEST PRACTICE

When not in use, remove your AMPEX sleeping bag from the compression sack and place it in the included mesh storage bag. This larger bag allows the fill in the sleeping bag to "breathe" and will ensure that the bag's temperature rating is maintained throughout its life.

CARE AND CLEANING

Your AMPEX sleeping bag may retain moisture depending on sleeping and travel conditions. When possible, use the loops at the foot of the sleeping bag to hang dry before storing in the mesh storage bag (or compression sack if you are on the trail).

For cleaning best practices, follow the instructions on the sew-in label on the sleeping bag.

Zippers are a critical component to keeping users warm and cozy at the campsite. If your zipper breaks, please contact service@ampexgear.com. Easy-to-install replacement zippers may be available.
