

Ice Dinosaur Eggs

Discover the hidden dinosaurs inside these icy eggs. They look amazing and it's great fun to watch the dinosaurs slowly hatch from their icy casing.

You will need:

- Party balloons
- Water
- Mini toy dinosaurs
- Baking tray
- A freezer
- Washing up bowl
- Spoon or water dropper

1 Open the neck of the balloons and push a mini dinosaur into each one (ask an adult to hold the balloon neck wide open - it's quite tricky).

2 Fill up each balloon with water then securely tie each neck.

3 Put the balloons onto the baking tray and place in the freezer overnight.

4 Take the balloons out of the freezer and cut the neck of each balloon. Then carefully peel the balloon away to reveal the icy eggs.

5 Put your eggs in an empty washing up bowl and you're ready to watch them hatch!

Use a spoonful of warm water (or use a water dropper) to help melt your eggs
