

Origami Bear

Practise your paper folding skills with this fun origami bear! Get a grown up to help you. Draw on a face once you've done and get creative with patterns!

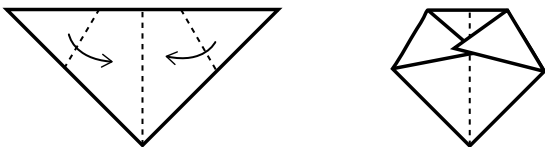

- 1 Start with a square piece of coloured paper or recycle some brown packaging paper and fold it in half diagonally.

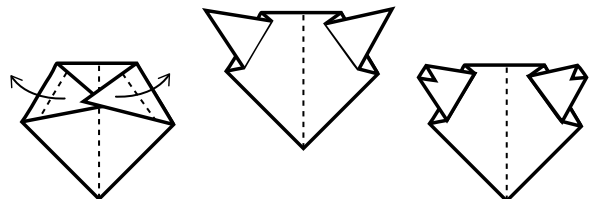

- 2 Fold it in half again to make a crease. Then open it out flat.

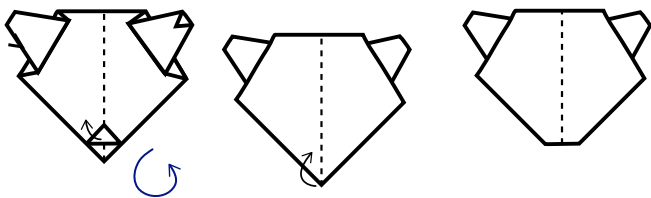

- 3 Fold down the two top corners on the longest side of the triangle. Roughly fold it along the lines as shown below so the points go just over the centre crease.

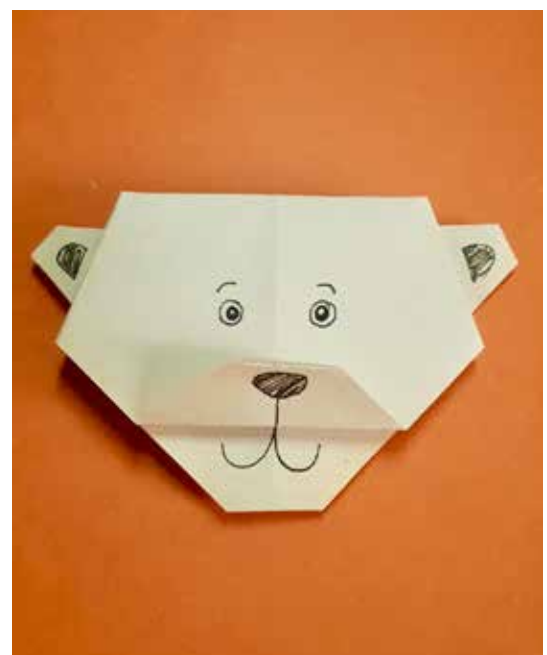

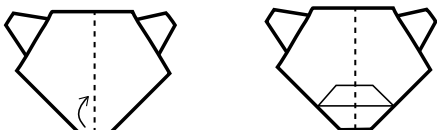

- 4 Fold the triangles you just made back out again following the dotted lines. Then fold down the tips.

- 5 Fold up the **top layer** of the bottom point. Then **turn over your bear**. Fold up the bottom point.

- 6 Fold up the **top layer** up again to create a mouth. Finally, give your bear a face! Use coloured pencils, pens or even googly eyes!
