

Origami Cat

Practise your paper folding skills with this fun origami cat! Get a grown up to help you. Draw on a face once you've done and get creative with patterns!

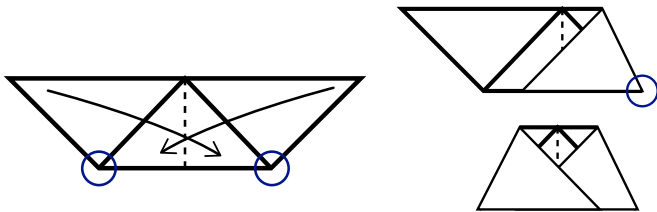

- 1 Start with a square piece of coloured paper, folding it in half diagonally. Open it up flat, turn it around and fold diagonally again.

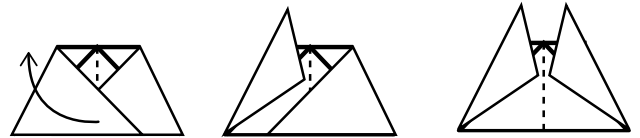

- 2 Keep it folded with the longest side at the top. Fold the bottom bit of the triangle to the top of the crease.

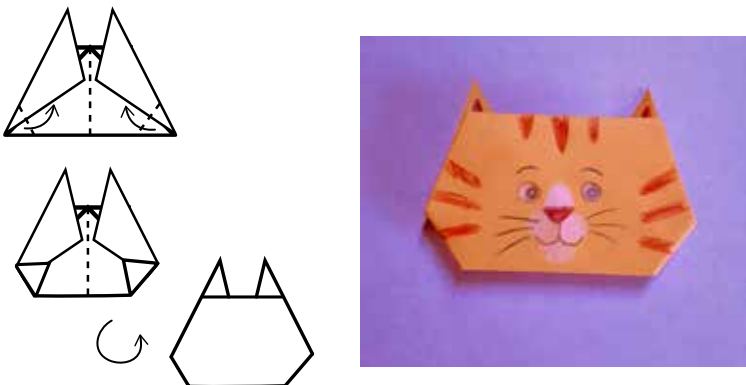

- 3 Fold down the two top corners on the longest side of the triangle. Follow the points circled. The two triangles you fold should overlap.

- 4 Fold up the triangles you just made. Line them up with the outer edges so the tips of the triangles are just sticking up over the top.

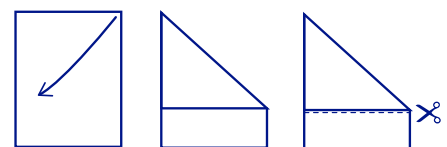

- 5 Fold up the two bottom points and then **turn over the cat**. Finally, give your cat a face! You could draw it on with pencils or pens or even stick on some googly eyes!

Top Tip!

If you don't have any square paper you can make your own! Take a rectangle piece of paper and fold one corner diagonally down so the edge lines up with the other edge of the paper. Then get a pair of scissors and cut along the bottom of the triangle. Half of Step 1 will then be done for you!
