

Paper Plate Noughts and Crosses

This is a great game to play outside if its a sunny day, but it can work just as well playing on the floor indoors if its a bit rainy! Have fun collecting the materials needed, and get set to create your very own super sized noughts and crosses game!

You will need:

- 10 Paper plates
- Coloured pens or paints
- Sticks or masking tape

Gather your paper plates and some sticks (you'll need enough sticks to make a large grid.)

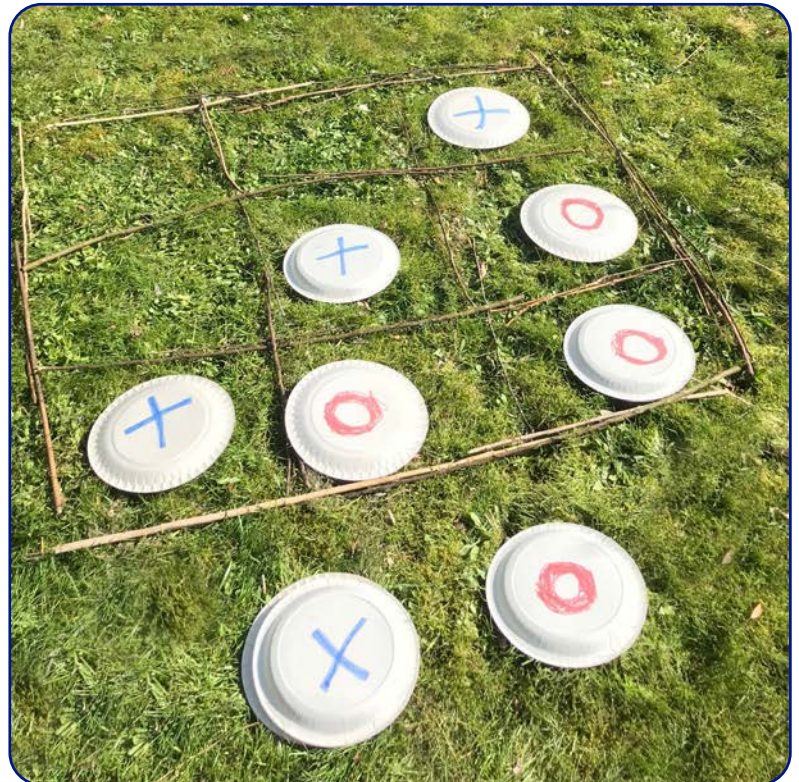

Use coloured pens or paints to mark five of the paper plates with crosses.

Use coloured pens or paints to mark five of the paper plates with noughts.

Create a grid from the sticks as above. You can use masking tape or string instead if you prefer. Make sure each square is big enough for one paper plate to fit inside.

All that is left to do is challenge another player to a game! The first player to get a row of three is the winner!
