「座る」を、デザインする。

まず一脚、座り心地が気に入った椅子を選びましょう。

ダイニングからリビングへのつながりを、暮らしの中心と考えて。

椅子に合わせてテーブル、そしてリビングのソファ―を。

家族で、パートナーと、あるいはひとりで、

食べる、語らう。くつろぐ、休む。考える、学ぶ―。

一日、一年、十年、ずっと心地よくいられる。

そんなわが家づくりを、カンディハウスとともに。

CondeHouse is a Japanese furniture manufacturer designing a way to relax at home rather than simply designing furniture centered on chairs.

Considering that dining and living spaces are the center of home and life, we think together with customers about the best chairs for their everyday lives first, and then about other furniture that goes along with the chairs.

We take great care to design a place where you can spend a very comfortable time with your family or even alone for many years to come.

Whether it's dining with family, laughing with friends, or relaxing after a long day of work, a chair is always there for you. A chair is never just a chair at CondeHouse.

自然に感謝し、森のそばで家具をつくる。

北海道の美しい森が、カンディハウスの原点です。

できる限り北海道の木を使い、一本一本を生かききって、長く使えるよりよい生活の道具をつくる。

私たちのものづくりの基準はいつも、森に正直であることです。

We build furniture by the forest, with a keen sense of gratitude for what nature has given us.

The beautiful forests of Hokkaido are the starting point of everything CondeHouse is.

We use Hokkaido wood for as much of our work as possible, using every last piece of wood to create items that will be part of your daily life for a long time.

Treating the forest well is at the heart of everything we do.

つくり手の努力と挑戦が、すぐれたデザインを形にする。

木の板をなででは削る手の横で、最先端加工機が軽やかに舞う。

カンディハウスの工場には、ものづくりへの挑戦を重ねることで培われた、手仕事とテクノロジーの高度な融合があります。

世界のデザイナーが「カンディハウスならできる」と期待してくれる理由です。

Excellent designs come from the creator's hard work and willingness to accept challenges.

In our factories, cutting-edge processing tools are operated alongside elaborate handcrafting.

CondeHouse's factory is a sophisticated culmination of manual work and technology, developed through a series of ventures into new forms of craftsmanship.

That's why designers around the world know that "if anyone can do it, CondeHouse can!"

ものづくりで、「和の美意識」を発信する。

創業時から引き継がれてきたカンディハウスのものづくりには、

自然を敬い、人を思う、日本の精神性が表れています。

「和の心」から生まれるやさしい形や繊細な機能は、心地よい暮らしを求めるすべての人と、共有できると信じます。

Craftsmanship that shares Japanese aesthetics with the world.

Respect for nature and consideration for people are important Japanese values,

and we have applied these principles to our craftsmanship throughout all of our years in business.

The heart of Japan is reflected in our gentle shapes and intricate functions, and we believe that these values enable us to make everyone's life more comfortable.

Lifestyle 02 HIN-品

穏やかな空気に包まれた上質な時間。

キーワード

上品な さりげない 洒落た 知的な

いくつになっても好奇心は尽きない。読みたい本を見つけて、リビングで読書をするのが習慣になっていた。時々浮かぶのは異国の街並みや美味しかった夕食。今では大きなダイニングテーブルでいつでも子供たちを喜ばせる準備を考えている。落ち着きある空間が時の流れをしっかりと感じさせる。

スッキリとした快適さと整理された暮らし。

キーワード

シンプル スッキリ 都会的な 合理的な

必要なものだけきちんと整理する、以前からそういう生活に憧れていた。意を決し整理整頓に取り掛かり、思い切って大型のキャビネットを新調してみた。今では部屋が片付いていないと落ち着かなくなった。忙しい毎日の中、意外に短い自宅での時間はくつろいで過ごしたい。

Simple & Natural

さらりとした木の床を素足で歩くような。
あなたが自分らしくいられる場所を、やさしくシンプルに表現します。

A style expressing a relaxing place in the nature where,
for example, you can feel a breeze under the sunlight filtered trees.

Lifestyle 05 SO- 素

自然な温もりと開放感。
優しい手触りに包まれて。

キーワード
自然な 肌触りの良い 飾り気のない 馴染みやすい

近頃よく耳にするサスティナビリティ。等身大でできることを暮らしに取り入れるのが自分に対する優しさだと気付いた。オーガニックコットンのシャツ、家庭菜園でとれた野菜やハーブを楽しむ、木の家具にも変えてみたい。天然素材の手触りや経年変化が、家族を癒し続けてくれる。

Contribution to Society

We aim to continue to make furniture in harmony with nature. This is our corporate philosophy made at the time of founding in 1968, based on the idea that wooden furniture manufacturing requires natural resources. In this time and age when the global environmental problem continues to intensify, we reaffirm the significance of the philosophy.

Every single tree should be used up to the end. On top of that, we have switched from using imported wood to local grown wood in order to lower the energy consumption of transportation.

CondeHouse will continue to produce beautiful and sturdy furniture, while reducing the burden on the environment.

Forest Stewardship

Development of forest and culture

Tree planting for the future generations

Healthy nature growing healthy trees is the foundation of our business. It is our standard to reduce the burden on the environment and to protect the health of customers. The total number of oak trees we've planted so far amounts to 50000. CondeHouse has been planting trees for over 20 years, and will continue to do that for the future generations.

Proper use of forest resources

Illegal logging has been long said to cause deforestation. CondeHouse uses logs certified by PEFC (the Programme for the Endorsement of Forest Certification) and FSC (Forest Stewardship Council), and is registered as a wood-related business entity of the Clean Wood Act. We always make full use of wood to the last small piece and produce safe and long-life furniture.

Kokonoki no Kagu Hokkaido Project

Active use of local wood

Furniture manufacturers in Hokkaido have expanded the usage of Hokkaido wood. CondeHouse has been using locally grown trees on its products, and the ratio of Hokkaido wood in our furniture production will soon exceed 60%. We believe this action will contribute to the reduction of carbon emissions by transportation.

Environmental load reduction

In order to keep pace with the environmental protection actions across the world, the green procurement law was established in 2000. The Japanese government has tried to support the development of eco-friendly society through obligating public agencies to procure eco-friendly products. Green Purchasing Network is an organization consisting of endorsing companies for the government program, and CondeHouse has joined as one of the members.

Use of Natural Resources

Wood

The features of wood

Every single tree from the forest has its own natural marks. The heartwood and sapwood almost never share the same color, and no wood shares the same trait. Here at CondeHouse, we utilize such marks given from the nature to make pieces of furniture look more beautiful.

Reliable and safe products

VOC (volatile organic compounds) emission and its human impact have become a big social problem, and the Japanese government has established laws and standards to regulate VOC. CondeHouse carefully chooses plywood, gules, etc. according to the government regulations.

Certificate of Japan Furniture Industry Development Association (JFA)

CondeHouse is certified by Japan Furniture Industry Development Association (JFA) as a manufacturer fulfilling the JFA requirements for quality furniture.

Leather stitching

The coexistence of beauty and efficiency

We use natural leather. Some of them may have natural marks that are the living proof of the animals. We leave such marks and apply stitching to the leather upholstery of some dining chairs and sofas, in order to use leather more efficiently.

Long Life Product Development

Universal and various designs

We offer a wide variety of lineup so that each of customers in different ages, with different tastes, etc. can find its own favorites for comfort. We have more than 50 kinds of dining chairs, keep on redesigning to improve quality and usefulness, together with international designers, and disseminate Japanese aesthetics to the world.

Replaceable seat covers

Detachable seat cover for long life

By adopting covering seats, customers can change seat upholstery very easily as seasons change or for room rearrangement. That makes seat upholstery more durable at the same time. When a seat cover is dirty, simply detach it and preform maintenance.

Timeless value

We always intend to make long-life products by carefully selecting materials; adopting robust and maintainable structures, and functional and timeless design; redesigning with the times to improve comfortability and quality.

Restoration and recycling

Waste reduction for the future of our society

It is normal to spot damages on furniture after using it for a long time. We do not encourage customers to dispose it right away. CondeHouse provides restoration and maintenance services to help your furniture last longer.

Contract Business

Interior design proposals from our experience of more than 50 years

Since 1968, CondeHouse has completed many projects not just in Japan but also across the globe, ranging from interior design planning to construction. We design furniture that can be used in, including but not limited to, homes, offices, shops, hotels, medical and public facilities. Please visit our website for more details.

<https://www.condehouse.co.jp/contract/>

If you have trouble in designing your own space, let CondeHouse help you. We not only produce chairs, sofas, and tables but also customize furniture based on your needs. Our interior design team will assist you and complete your dream space.

If the regular items do not satisfy your needs, do not worry. CondeHouse provides customized service to meet all your demands. To ensure the highest quality, all the customized items will be made in our factory.

About CondeHouse Products

Wood finish

Our wood coating is prepared to be transparent to emphasize the natural grain and color of wood. The color portfolio is unified to each wood so that our items from different collections can be coordinated for various styles of rooms.

Fabric / leather for upholstery

About 80 kinds of fabrics and leathers are available for chairs and sofas, and they regularly change according to the times and trends.

Chair height customization

Seat height is very important. You cannot feel comfortable with a chair with inappropriate seat height. We cut chair legs according to customers' requests. Additionally, we respond to other diverse requests such as cutting table legs, changing table top size, etc.

Water repellent finish

Pearl Tone (TM) is a water-repellent finish, often used for Japanese kimono. Now, it is evolved to Pearl Tone (HG) for furniture upholstery, stain-proof in addition to improving water-repellence, but makes almost no change in the texture of upholstery fabric.

Restoration

Repair

(this service is only provided within Japan)

In order to keep sustainability of the wood industry, it's important to use wood at the same rate of tree growth. We re-upholster or re-paint trade-in furniture, and also emphasize the maintainability of our products to make repair easier.

Recycling

Trade-in and resale

(this service is only provided within Japan)

Now that nearly half a century has passed since we started business, there are many customers replacing their old furniture with new ones from our lineup again. We trade-in, repair, and resell such old furniture as vintage products.

Materials

Wood

Grain

We cannot gain a lot of straightgrain part from one tree. Places where branches once grew become gnarls, and the grains of such places wave. We place these wood characters efficiently on the surface of furniture so that they look attractive.

Surrounding environmental effect

Exposed to direct sunlight or hot air from heater, wood may suffer from color change or small splinters. Even so, it makes a comeback by repair.

Color

Even though lumber boards are taken from the same wood, the color of the boards may vary for their places of the wood: outside or inside; upper or bottom.

Aging changes

Wood (especially solid wood) keeps on moving after processed into furniture. Table top boards of solid wood may warp or break. Even so, they can continue to be used by repair.

Damages

Solid wood furniture may be dented by impact or burned by heat. Even after such damages, it can continue to be used by repair: dents by steam heating; burnt places by whittling and painting.

Grain

Random match

Wood planks or veneer sheets are joined at random, of which expressive surface patterns require craftspeople for high skills and an eye for beauty.

Book match

Two pieces of wood planks or veneer sheets with similar surface patterns are arranged side by side to look like a book opened, which makes surface patterns look more dynamic by grains running symmetrically.

Slip match

The most simple but beautiful repeating surface pattern is produced by arranging in order wood planks or veneer sheets facing in the same direction. In most cases, straight grain planks or veneer sheets are preferred.

Fabric

Carefully selected materials

Cotton with dry feel, breathing linen, and regenerated fiber, rayon, well known for its beautiful glow. They are the main materials used for the upholstery of our furniture and cushions. We carefully select those materials for comfortability, design, etc. The sum of such small considerations will make a big difference.

Wide variation

Fabric collections varying in color, pattern, texture, etc. Some of them may just look simple and basic at first glance, but a closer look will show complex woven patterns, brightness, etc. By combining those fabric collections with our options of wood and its color coating, the attractiveness of our products will expand in the three styles: North noble; Simple & Natural; Advanced classic.

Leather

Bits of knowledge about leather

Hide is tanned into leather. A close look at the surface of leather shows many scars and wrinkles called natural marks. Leather can be divided into two types by surface treatment: full grain leather (RK, MG, KP, BQ and GR); corrected grain leather (EN and MR). The seven CondeHouse leather collections are appropriately and characteristically painted or embossed for the texture and maintainability.

Paint

There are two major paints for leather: pigment and aniline. Pigment coats the surface of leather, while aniline penetrates inside. These two paints are mixed for the leather collection of CondeHouse so that texture, concealment of natural marks, and maintainability can keep a balance at a higher level.

Texture

We have embossed leather as well as natural wrinkle leather to maximize the charm of natural leather grain.

*Japanese Oak

Oak is likely to have tiger stripes; especially Japanese oak is more. Other natural marks may also appear on top boards, backrests, arms, etc., which is intentionally designed for beautiful harmony.

*Japanese Birch

Japanese Birch is a tree locally grown in Hokkaido. The heartwood is red; the sapwood is white. Here at CondeHouse, we use both heartwood and sapwood. Consequently, their mixed natural colors make our furniture look unique.

About KOKYU, CondeHouse original fabric

This is an original fabric developed by CondeHouse and a Hokkaido-born designer, Kanako Kajihara. It is made from Japanese raw materials in Japan for sustainability. We aim at an unique fabric that connects you to the nature of Hokkaido. Part of the fabric is made of the wood chips of Hokkaido oak trees produced in our furniture production.

Maintenance

How to place furniture

Place furniture as flatly as possible in order to prevent strength deterioration, breakage, and collateral damages. Don't forget to set up adjusters for furniture in case they are installed. When moving furniture, be careful not to damage paint or make dents.

Direct sunlight and heat

Direct sunlight may deteriorate the color of natural materials: wood, fabric, and leather. Heat and extreme dry conditions may warp wood.

How to maintain furniture

Wooden furniture is vulnerable to water or moisture. Wipe softly with a dry cloth and don't rub hard in order to avoid scars. When it's dirty, wipe with a squeezed wet cloth and then with a dry one. Don't use volatile liquids such as benzene, alcohol, or thinner in order to avoid color deterioration.

How to maintain fabric

Pad softly and vacuum dust coming onto the surface. When it's stained, pad softly with a cloth firmly squeezed after being soaked in a neutral detergent, wipe with a squeezed wet cloth, and finish with a dry cloth.

How to maintain leather

Wipe with a dry cloth as needed. Don't rub too hard to prevent a clog of dust in pores; don't use oil cloth to prevent stains. Vacuum-clean with a soft brush regularly.

How to maintain cushions

Padding softly and pulling into shape prevent cushions from wrinkling and losing shape.

CondeHouse Factory

Sawmill factory

The water content rates of wood are controlled to be appropriate as material for furniture. The rates are controlled by master craftspeople who know everything about wood. This is the beginning place for our production.

North factory

This factory is for cabinets, tables, and even detailed custom made products, where large machines are installed, so that big panels of up to 1.5 m x 3.0 m can be processed.

East factory

Master craftspeople manipulate state-of-the-art machines in our factories, where substantial synergy is provided. Every single wood is different, and therefore, each wood is processed appropriately to its characteristics.

The head office of CondeHouse with our development, administrative and marketing divisions is located in Asahikawa, Hokkaido, next to the factories. We also maintain close ties with other factories for certain types of specialty work. Flexible and consistent production is assured through small-lot production using a system that covers every step from acquiring materials to machining, assembly, and shipping. This system also offers customers the advantage of quick turnaround on custom orders and other special orders.

Upholstery factory

A large variation of fabrics is offered for chairs and sofas, and the lineup is regularly refreshed, reflecting the international trend of interior design. In addition, leather suitable for different applications is also offered.

IPPONGI

IPPONGI was launched in 1997. At this oldest factory used since the establishment of CondeHouse, more importance is laid to traditional techniques. Only small number of selected craftsmen are deployed, and they have been making furniture with their long experience in wood working.

Restoration lab

Fortunately enough, we have many customers who want to use our products long even after the products are damaged or stained. The Restoration lab responds to such requests. Our experienced craftsmen listen to customers' requests and restore long-used furniture accordingly. Nothing pleases craftsmen more than their products are long used.
