

Description

The MTi Group's **SPRINGLOCK** are used for restraining cartridges and explosives in the holes during tunnelling operations. The **SPRINGLOCK** tunnel spider will keep charge at the toe of the hole to maximize fragmentation, which is especially ideal for angled holes. The **SPRINGLOCK** is classified as a stemming device in some countries, it provides an economical and productive method to stem holes.

Application

The **SPRINGLOCK** is made from rigid plastic with a unique shape designed for easy insertion. The **SPRINGLOCK** is mainly used in civil and mining projects with drill hole size ranging from 45mm-50mm. The **SPRINGLOCK** is designed to go in but not come out.

Ordering Details

Item Number	Size Suitable	Qty per box
01-011	45 mm – 50 mm	1500
