

## **Finger Size And Measuring:**

Your ring should fit snug enough that it will not fall off, but loose enough to slide over your knuckle. If your knuckle is much larger than the base of your finger, be sure to measure both the base of your finger and your knuckle. Then select a size between the two to allow enough room to comfortably slip the ring over your knuckle. Finger size changes depending on the time of day and the weather. For best results, measure your finger size at the end of the day and when your fingers are warm.

## **Paper Ring Sizer:**

Print and carefully cut out the paper ring sizer. Cut along the dotted line to make a slit as indicated in the diagram. Slip the end (A) through the slit (B), and place the sizer around your finger. Pull the end so it slides to a comfortable but snug fit (see photo).

## **Measuring With String:**

Wrap a piece of string snugly around your finger for an accurate measurement. After you have determined the size by wrapping the string around your finger, compare your measurement to our ring sizing chart. For the most accurate fit we recommend that you have someone help you measure.
