Cushion Material: Molded polyurethane foam for cushioning
Finish Material: Leather (Leatherette)
Armrest: Aluminum die-casting with powder coating
Frame and Legs:
Base: Cold and hot-rolled steel plate
Frame: Structural carbon steel pipe (75*45mm)
Legs: Aluminum die-casting with powder coating
Foot: Hard plastic injection molding

Function and Features:

The ergonomic shape and curves are designed to fit the human body, with the seat height standardized for optimal comfort. Parts are easily separable and assembly is straightforward. The inclusion of floor-friendly, noise-reducing foot caps with adjustable leveling ensures added convenience and prevents floor scratches.
