COOKINU

WELCOME

\$COOKINU is a token (BEP20) based on the Binance Smart Chain, aiming to be the next ultra-trendy crypto with its buyback system to support the price when needed, auto rewards in BNB every 60 minutes and aggressive marketing, all these ingredients will make \$COOKINU the perfect recipe that will satisfy the hunger of our detenders!

The \$COOKINU roadmap, presented by the \$COOKINU team, is a clear and easy to follow plan that will lead the crypto-currency to its promised land!

COOKINU

TOKENOMICS

4% REWARDS

4% of all transactions are converted in BNB & redistributed in to all wallets that hold more than 500,000 units, proportion to the percentage of the total supply they hold.

3% LIQUIDITY

3% of transactions are automatically put into the liquidity pool to maintain the price, the liquidity pool is also locked for a period of 1 year for peace of mind for holders.

3% BUYBACK

3% of all transactions are stored and then re-injected as needed in difficult times, such as large dips, to maintain the token price.

5% MARKETING

5% of transactions are invested in development and marketing, with advertising, listings and influencer placements, allowing for continued growth.

COOKINU

SUPPLY

TEAM 5%
MARKETING 5%

LP HOLDING 90%

50'000'000'000
MARKETING

50'000'000'000
TEAM

900'000'000'000
LP HOLDING

1'000'000'000'000
TOTAL SUPPLY

COOKINU

FATR LAUNCH

The launch of the token is fair, no one except the team working on the project will have access to the tokens before the launch, so that everyone is on the same footing and no one dumps on the people who buy at launch.

LOCKED LIQUIDITY

Initial liquidity will be locked for a minimum of 12 months to provide holders with peace of mind that the token can always be exchanged. A trust 3rd party, Deeplock; will operate as the middle man to ensure that all raised liquidity is locked in a secure locker for the full timeframe.

COOKINU

BNB REFLECTION

When you buy tokens and hold them, every 60 minutes you will automatically receive BNB in your wallet (4% of all transactions are stored, and redistribute according to the percentage of the supply you hold), no action is required, keep in mind that the holder needs 500,000 tokens to benefit from the hourly redistribution

The more supply you have and more there are buy and sell transactions, more you earn!

COOKINU

DECENTRALIZED EXCHANGE

A \$COOKINU/BNB liquidity pool will be created on the decentralized Pancakeswap exchange on January 9, 2022 at 12:00 PM (Los Angeles). Pancakeswap is a decentralized exchange (DEX) based on Binance Smart Chain to exchange BEP-20.

The coin will be available for purchase directly on Pancakeswap and also on Poocoin.

COOKINU

ROADMAP

BIRTH

In the first part, we start to create the project in order to give it life. The design of the token, the website, the whitepaper, the functions of the tokens, the smart contract, the merch, the social networks...

DEVELOPMENT

In the second part, we will start to build a community, by making giveaways, partnerships with influencers, campaigns on social networks and we will be listed on major sites (about ten token launch sites)

GROWTH

In the third part (the most important), we will start from the day of the launch with promotions on token listing sites and do a big marketing campaign using the power of social networks, with the aim of getting listed on CoinMarketCap and CoinGecko and keep growing.... But the project doesn't stop here, with the help of the community we will create a solid base and consolidate our foundations with a complete redesign and integrations to create the next roadmap!
