| 1 | 91515A570 | N/A | #8-18 x 2.5" Self-Tapping Phillips Screw |

Step 1:

Release and pull the rear seat back. Take note of how the rear seat latch is aligned and remove the three bolts with the 8mm socket. Place the molle panel bracket over top of the seat latch bracket and reinstall with the factory hardware. Leave the hardware slightly loose.

Step 2:

Remove the first upper trim screw and install the upper front bracket with the factory hardware. Leave the hardware slightly loose.

Step 3:

Remove the rear upper trim screw and install the upper rear bracket with the factory hardware. Leave the hardware slightly loose.

Step 4: (1997+)

Remove the factory panel screw from the rear panel of the Jeep and install the lower rear bracket with the supplied screw. Leave the hardware slightly loose. If you have a 1996 or older Cherokee, you will install this bracket after installing the molle panel.

Step 5:

Install the molle panel using the provided stainless steel button head bolts. We recommend using some anti-seize on these bolts. With the molle panel in the desired location, start tightening all the hardware.

Step 6: (1996-)

Install the rear lower bracket on to the molle panel. With the bracket in the desired spot, use it as a guide to drill a hole for the provided screw. This is a self-tapping screw, so a small pilot hole should work. Fully install the rear lower bracket and tighten all the hardware.

Congratulations you have completed the installation of your XJ Rear Window Molle Panel!
