

[MOH](#) > [Getting Tested](#)

Are there any age restrictions on the use of the Antigen Rapid Test (ART) kits?

ANSWER

Generally, those below 12 years old will require an adult's assistance to administer the ART self-test.

Please refer to the manufacturer's instructions provided within the ART self-test kits for usage instructions and other specifications.

The following two brands of ART may be administered by parents/ caregivers on children under 2 years old:

- Abbott Panbio COVID-19 Antigen Self-Test
- Acon Biotech Flowflex SARS-CoV-2 Antigen Rapid Test (Self-Testing)
