

6 BEANS  
ROASTING

# Your New Coffee Roaster!

Small batch roasted with an electric-powered, fluid bed roaster. Minimizing contact with chaff and rancid oils sometimes left in more traditional roasters. Notice the depth of flavour, ease on your stomach, and incredibly clean, smooth taste!

Our beans are the finest, specialty grade. They are traceable to their farm or region of origin, and are grown ethically & sustainably.

We are currently seeking partnerships with select coffee shops/restaurants in all the communities of the Okanagan/Shuswap region and beyond.

Let's chat!! We can setup a tasting and some samples.
