

How to use Australia's breakthrough cleaner.

100% Natural Cleaner.
Hospital-grade disinfectant. An industry breakthrough formula.

Hospital-grade disinfectant

1:0 Use Universal Cleaner undiluted

Spray undiluted Universal Cleaner and wipe with a damp Microfibre Cloth. Follow with a wipe-over with a dry Microfibre Cloth.

Household-grade disinfectant

1:3 Mix 1 part Universal Cleaner with 3 parts water

- EXAMPLE 1 **Thankyou 500mL recycled plastic or aluminium Forever Bottle:**
125mL Universal Cleaner : 375mL water
- EXAMPLE 2 **Thankyou 400mL Glass Forever Bottle:**
Fill with Universal Cleaner up to the 1:3 fill line and top the rest with water.
- EXAMPLE 3 **1L bottle of household-grade cleaner:**
250mL of Universal Cleaner : 750mL water

Antibacterial floor & window cleaner

1:9 Mix 1 part Universal Cleaner with 9 parts water

- EXAMPLE 1 **Thankyou 500mL recycled plastic or aluminium Forever Bottle:**
50mL Universal Cleaner : 450mL water (or fill the rest with water)
- EXAMPLE 2 **Thankyou 400mL Glass Forever Bottle:**
Fill with Universal Cleaner up to the 1:9 fill line and top the rest with water.
- EXAMPLE 3 **1L bucket of floor cleaner:**
100mL of Universal Cleaner then fill to the top with water.

LIFE HACK For the hands-down easiest and most addictive window clean, use a **4-in-1 Squeegee**.

Dilution revolution – Australia's most affordable cleaner

- 1:0** Hospital Grade Disinfectant
- 1:3** Household Grade Antibacterial
- 1:9** Antibacterial Floor & Window Cleaner

How to use this cleaning wizardry: 4-in-1 Squeegee

- For a quick fix:**
Fill 1 part Universal Cleaner, 9 parts water (fill line marked on Squeegee). Then simply spray and wipe.
- For grease or extra tough stains on your windows:**
Use a Microfibre Cloth first to remove tough stains, followed by your Squeegee.
- Got all-the-windows to clean:**
Clip your Squeegee into the holder to transform it into your new cleaning companion for easy window cleaning. The sponge gets the tough stains and the squeegee leaves you with a streak-free clean.
- How to set up your new (best!) friend:**
 1. Attach spray bottle to your squeegee head and turn counterclockwise
 2. Add your extension pole, align the Squeegee head and slide into place
Quick tip: Your spray bottle should be facing the opposite direction of the cleaning pad to securely click into place. Squeeze the spray bottle trigger in the direction of the surface you're trying to clean.
 3. At the base of the extension pole, you'll find a rotation lock. Pull this down, and rotating left or right, and push the lock up into place to secure the position.
Quick tip: Clockwise rotation will expand your expansion pole, and when in place, a quick turn anticlockwise will lock it into place. Repeat this process, but push into a standard position to return to standard size.
 4. Finished cleaning? Go you! To remove your spray bottle trigger, you'll find a spray bottle lock. Pull the lock upwards and out to remove.
