

Revolution on Air!

Probably the World's Fastest Purifier

Kills Covid-19 Virus in
Just **32** seconds*

Removes >99.99%* Virus and Bacteria.

We inspire while you respire

Global warming, novel viruses, vehicular pollution, construction dust, and every new disaster or development deplete the quality of air. New pollutants become a part of the air we breathe. It's impossible to control natural calamities, virus outbreaks, international trade, or even stop driving the car. It's possible to get AirFlexe.

Why Does Your Space Need An Air Purifier?

Better Employee Health

Clean air is rejuvenating. With less pollutants, microbes, and dust in the environment, employees are less likely to get sick. Employees' well-being is the backbone of any successful organization.

Higher Productivity

High performance of indoor air quality enhances workers' concentration and cognitive ability. A good indoor environment is vital to maintain employees' satisfaction and productivity. Hence leading to positive business growth and economic outcomes.

Safer Work Environment

Covid-19 has changed business function. By introducing an air purifier, you are making the workplace safer. In fact, CDC recommends to put forward air purifiers to reduce the chances of infections (especially Covid-19)

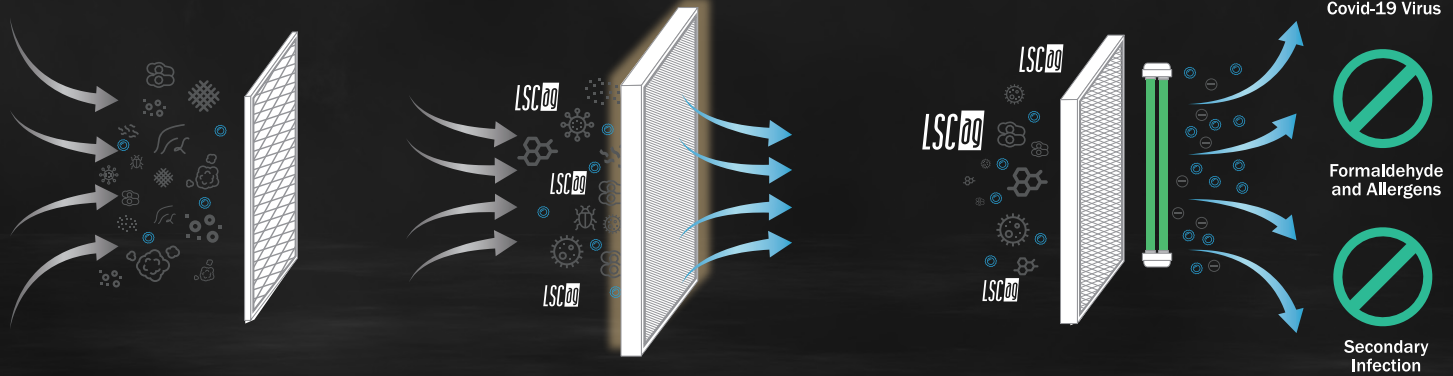

Higher Energy Efficiency

Portable air purifiers offer a highly efficient method of cleaning the ambient air without incurring huge energy costs. Heavy duty appliances are energy consuming and need SESS technology to achieve greater energy efficiency.

Boosts Employee Productivity and Energy Efficiency

LSCag - Revolutionary Antiviral 2.0 Technology

Advanced 3-Layer Filtration Architecture X UVC Sanitizing System

Technology

Primary Filtration

- Pre-Filter

Advanced Filtration

- UV resistance layer
- HEPA H13 Filter
- Light Self-cleaning Silver Ion (LSCag)

Ultimate Filtration

- Photocatalytic Oxidation Layer
- Plasma Purification Layer (Anion)
- UVC Sterilization

Air Purification Efficacy

Dust

Hair

Fibre

PM2.5

Pollen

Pet dander

Formaldehyde and VOC

Bacteria

Pet fur

Particles

Environmental Pollutants

Virus

Streptococcus pneumoniae

Coronavirus (SARS)

Remaining virus

Tobacco Smoke

A Sustainable Revolution That You Can See, Feel, and Breathe

What makes us special?

IoT App and Big Data Ready for Future Needs

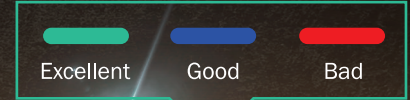

The IoT-compatible AirFlexe is built for the future. Equipped with an IoT app and big data tech, AirFlexe optimizes performance and maximizes protection against pollution and pathogens.

Control AirFlexe from anywhere.

Indoor Environmental Quality (IEQ) Indicator

The accurate (AQI) indicator shows you the quality of the air in the room.

Remove Formaldehyde and Allergens

AirFlexe filters away formaldehyde and allergens to prevent skin rashes, sore throat, eye irritation, wheezing, shortness of breath, and other allergic reactions.

Advanced Noise Reduction

Ultra quiet with 3 air flow modes: The Lowest, Middle to the Highest. Switch to the mode that fits into your need without any disturbance to your employees.

Prevent Secondary Infection

Covid-19 patients undergoing immunity-suppression treatments are susceptible to secondary infections. AirFlexe protects them by eliminating the pathogens in air.

AirFlexe: Sustainably protects Your Health, Kind on Your Pocket, and Planet-friendly

Industry Certified

The high standards of AirFlexe performance are reiterated by the numerous industry certifications.

Ranging from FDA, Intertek, IEC, IECEE, and more.

Specifications

Filtration Efficiency (Covid-19)	32s* (>99.99%)
Suggested Area (sqft)	538
Particulate CADR (m³/h)	370
Filtration Efficiency (Grade)	≥99.97% (H13)
APPS Control	✓
Light Self-cleaning Silver Ion for Antivirus (LSCag)	✓
FDA Medical Grade Certification	✓
SGS Product Certification	✓
UV Disinfection	✓
Plasma/Ionization	✓
PM2.5 Removal	✓
TVOC Removal	✓
Formaldehyde Removal	✓
PM2.5 Sensor	✓
Child Lock	✓
Photocatalytic Oxidation Layer	✓
Sleep Mode	✓
Filter Replacement Alert	✓
Filter Life	12 to 18 Months
Product Size	W390 x D230 x H625 mm
Warranty	12 Months
Weight	8.4 kg

Are You Breathing Air or Something Else With It?

airflexe.com

*Results of MRI Global test report as of August, 2022 - The fastest time in the market in killing variants of SARS-CoV-2 virus from the test system within 32 seconds, Effective at removing aerosolized variants of SARS-CoV-2 virus from the air within 32 seconds of operation as compared to control test results.
