Rollover Application Table & Accessories

IDEAL FOR RIGID PANEL APPLICATION AND LAMINATING DIGITAL PRINTS

Applying digital prints and other self-adhesive applications on rigid panels such as composite board, acrylic, aluminum etc., is just one of the areas where Rollover reveals its excellent properties in results and operations. Substrates can be handled for perfectly flat applications without bubbles or creases.

Optimal and ergonomic work positions have been the basis for the design. Being able to easily operate the applicator with one hand, whilst being able to handle the media, table, and other accessories with the other. This results in a fluid working environment in which minimal time and waste is used while maximizing the capability of the operator. Jobs that used to require two people can now be completed in an equal or faster time with one person.
