What to Expect:

Installation for Ceilings and Wall Panel Kits:

Our service includes the installation of rivet nuts and panels only. We do NOT install any electrical, insulation, or plumbing.

Your vehicle may have these done, but we will not make cutouts or modifications for them. Please keep all obstructions out of the way for the ceiling/wall panels prior to arriving at our shop. All extra wiring must be taped or tucked out of the way. We will not cut and rewire your wiring to fit our panels.

A pre-installation inspection will take place prior to starting. We will reject any installations that violate these requirements.

Serg Supply reserves the right to deny service if terms and conditions are breached and/or disregarded.

Installation for Cabinetry:

Our service includes the fastening of our cabinetry to your vehicle walls. We do NOT install wiring or plumbing. Please keep all obstructions out of the way of cabinetry installation prior to arriving at our shop.

If the vehicle contains walls/ceiling that is not from our line of products, we must have written permission from the customer for the following:

Serg Supply may alter any kit to install our cabinetry.

While we always work to have the utmost customer satisfaction and great installation service, we cannot guarantee the quality or temperament of kits that do not come from our shop.

Therefore, Serg Supply is not responsible for any damage that occurs to existing kits within the vehicle while installation takes place.

Serg Supply has the right to deny service if terms and conditions are breached and/or disregarded.
