# CREATING OUTDOOR EXCELLENCE

**WITH AUSTRALIA'S FAVOURITE SYNTHETIC GRASS,  
SPORTS AND PLAYGROUND SURFACE PROVIDER.**

Creative and engaging outdoor spaces are integral to a child's development. Play-based learning is most effective when children can investigate and pursue their interests across an array of environments, including outdoor learning spaces. It is our goal to work with educators to maximise thoughtful outdoor play space in a way that reflects children's current interests, and empower them to engage in fun, playful physical activity.

Our team will collaborate with you to design and workshop a space that functions best for your community's needs, whether that be an all-weather multipurpose field, or a cushioned rubber playspace with play equipment. Our previous work with education facilities at all levels has earned us a reputation as the choice provider for outdoor education centres, kindergartens, schools, and universities.

## DESIGN & PLANNING

**WE'RE UNIQUELY QUALIFIED TO HELP YOU PLAN YOUR NEW SPORTING OR ATHLETICS FIELD.**

Composed of both architects and engineers, our team is perfectly poised to workshop and realise the most engaging spaces possible.

Whether your project is an elite FIFA pitch or a vibrant, play-based space, our specialist team of project designers are capable of developing site-sensitive project solutions that elevate and uplift the communities in which they exist.

Our design process entails a detailed project brief and site evaluation that allows the most cost-effective, functional, and environmentally sustainable option to be developed. We undertake comprehensive site investigation works that inform our site response, ensuring that the end product services the varying needs of the end-users. Our concept designs provide a logical development of needs, wants, and ideas to explore.

**FASTPRO IS DESIGNED TO PERFORM  
IN THE AUSTRALIAN EDUCATION CONTEXT.**

FastPro 18 has been specifically engineered to perform in Australian sporting contexts, from elite FIH hockey fields, to durable multipurpose applications in schools and education facilities. Designed in Melbourne by our specialist team, FastPro 18 has increased dimensional stability to minimise movement, hence creating a long-lasting, reliable surface. This system requires only sand infill, achieving FIH Category 3/Category 4 certification, and can be used in both wet and dry (sand-dressed) applications. The system is designed for high-level “dry” play where irrigation is limited or unavailable, increasing the environmental benefit of this system. The curly, texturised monofilament synthetic grass fibre is exceptionally hard-wearing without sacrificing its playability.

**APPLICATIONS:**

**FEATURES & BENEFITS:**

FIH CERTIFIED  
FIELD SURFACE

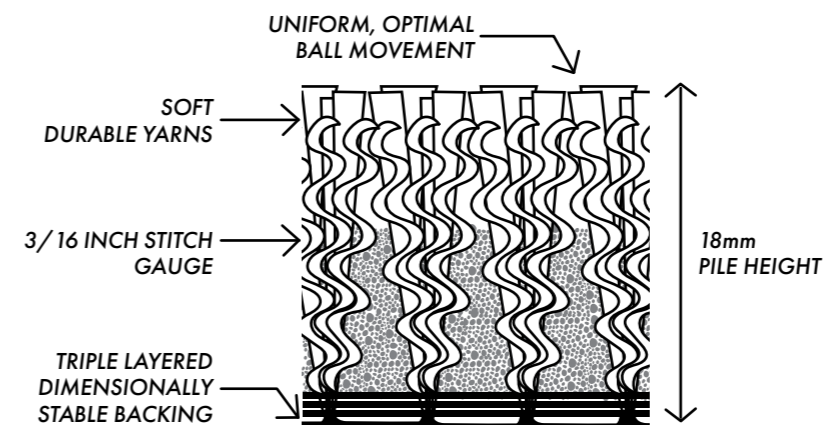

FIBRES SUITED TO THE  
AUSTRALIAN CLIMATE

UV STABILISED TO  
CONTROL COLOUR FADE

8 YEAR  
WARRANTY

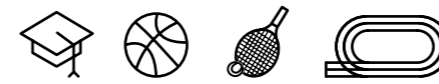

**PRODUCT SPECIFICATIONS:**

DTEX:	8,000
PILE HEIGHT:	18mm
MM TOTAL TURF WEIGHT:	3,000g/m <sup>2</sup>
STABILISING INFILL:	Kildn dried sand
PARTICLE GRADING:	0.315-0.8mm

**THE BUDGET-FRIENDLY GO-TO FOR YOUR NEXT TENNIS OR EDUCATION PROJECT.**

MultiCourt 19 has been designed in Melbourne for use in the Australian education and tennis market. A versatile, value-driven surfacing solution that doesn't compromise on quality, MultiCourt 19 is perfect for creating engaging play spaces and functional sporting facilities. It has been used in countless installations around the country; its unique polyethylene structure never fails to stand up in the harsh Australian climate.

**APPLICATIONS:**

**FEATURES & BENEFITS:**

19mm PILE HEIGHT

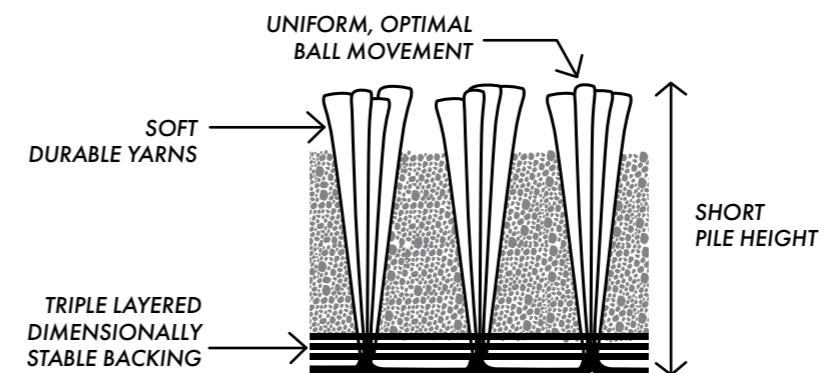

HEAT RESISTANT INFILL & FIBRES SUITED TO THE AUSTRALIAN CLIMATE

UV STABILISED TO CONTROL COLOUR FADE

7 YEAR WARRANTY

**PRODUCT SPECIFICATIONS:**

DTEX:	8800
PILE HEIGHT:	19mm
TOTAL TURF WEIGHT:	2014g/m <sup>2</sup>
STABILISING INFILL:	Kiln dried sand

**VMAX40 IS ENGINEERED TO MEET EVERY STANDARD ON THE FIELD.**

Vmax40 is the perfect all-rounder for use in nearly any context. The system's soft, lifelike fibres are perfect for creating an all-weather outdoor playspace, transitional area, or dedicated ball sports field. The Vmax40 system benefits from a UV-resistant, dual-yarn system that reduces infill splash and migration, and maintains its bouncy, lush texture even under high-use conditions. This system can be combined with an elastic shockpad layer for even greater utility, making it perfect for hybrid sports use in an education context. As a further testament to this product's quality, it is FIFA Quality certified, ensuring your facility is surfaced with only the best.

**APPLICATIONS:**

**FEATURES & BENEFITS:**

FIFA CERTIFIED FIELD SURFACE

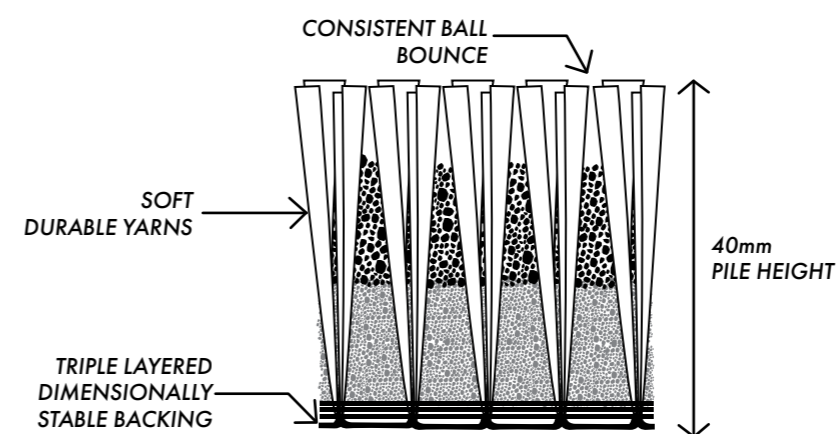

HEAT RESISTANT INFILL & FIBRES SUITED TO THE AUSTRALIAN CLIMATE

UV STABILISED TO CONTROL COLOUR FADE

8 YEAR WARRANTY

**PRODUCT SPECIFICATIONS:**

DTEX:	17,500
PILE HEIGHT:	40mm
TOTAL TURF WEIGHT:	2725g/m <sup>2</sup>
STABILISING INFILL:	Kiln dried sand
PERFORMANCE INFILL:	SBR & TPE

**VMAX50 IS ENGINEERED TO MEET EVERY STANDARD ON THE FIELD.**

Vmax50 was developed here in Melbourne, after significant collaboration with end users such as football clubs and education facilities to create the perfect football or multipurpose surface. This system utilises a dual-yarn composition that minimises infill splash whilst ensuring the playing surface is consistent, durable, and of elite quality no matter the circumstance. This system is both FIFA and AFL/CA certified, and like all our surfaces, is manufactured and installed under strict ISO9001 Quality guidelines and procedures. This system can be used with recycled infill, increasing the environmental credentials of a facility. Feedback from previous clients underlines this system's quality and performance as an asset to clubs and facilities alike.

**APPLICATIONS:**

**FEATURES & BENEFITS:**

FIFA/AFL CERTIFIED FIELD SURFACE

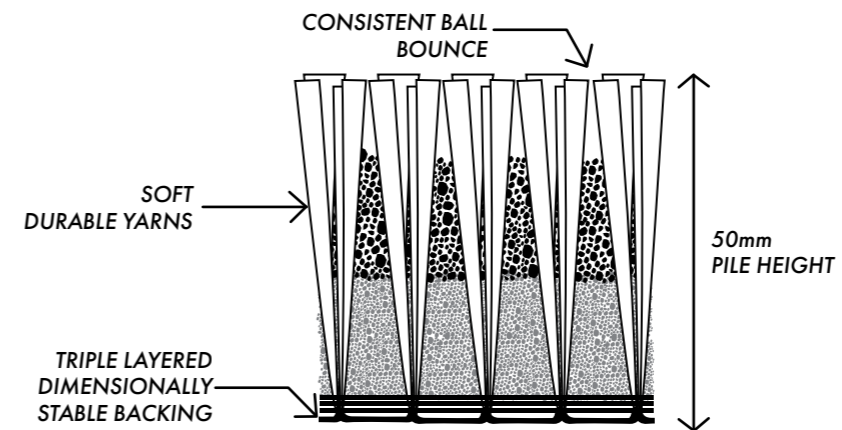

HEAT RESISTANT INFILL & FIBRES SUITED TO THE AUSTRALIAN CLIMATE

UV STABILISED TO CONTROL COLOUR FADE

8 YEAR WARRANTY

**PRODUCT SPECIFICATIONS:**

DTEX:	17,500
PILE HEIGHT:	50mm
MM TOTAL TURF WEIGHT:	2,990g/m <sup>2</sup>
STABILISING INFILL:	Kiln dried sand
PERFORMANCE INFILL:	SBR or TPE

# MULTICOURT SIGNATURE

SYNTHETIC SURFACES  
**MULTICOURT SIGNATURE**

**THE CHOICE SURFACE FOR TENNIS,  
 NETBALL & BASKETBALL.**

*MultiCOURT Signature's* extraordinary qualities speak for themselves in every aspect. The uniquely structured fibres promote its long term standing abilities which contribute to exceptional player performance, offering increased tactility and maneuverability. Fibres are extruded with advanced polymer technologies that contribute to a soft and flexible surface. Advanced production equipment with strict control of technological process ensures the durability of the turf system will withstand prolonged wear, eliminating any possibility of expanding, diverging, compaction and displacement, even after excessive use.

**APPLICATIONS:**

STABILISING INFILL:	Kiln dried sand

**THE ADVANTAGES OF A HARD COURT,  
 WITH THE COMFORT OF A SYNTHETIC COURT.**

The composition of the CasaliSport Supersoft acrylic synthetic resins gives a uniform surface that ensures excellent technical performance: improved comfort, perfect ball bounce, excellent friction and slide coefficient ratio, and high impact absorption to ensure a fast, safe, and enjoyable game. The surfacing is durable, easy to lay, requires no maintenance, and is resistant to even the harshest Australian weather conditions. The CasaliSport Supersoft system is classified by the ITF in Class 4 (medium-fast), and is the official surface for some of the most important international tennis tournaments. This system is perfect for application on outdoor netball courts, basketball courts, and multi-sport areas, and the vibrant colours let even the most creative designs shine.

### **THE LEADING ENVIRONMENTALLY FRIENDLY PRE-COLOURED SOFTFALL RUBBER CRUMB.**

Tuff Group supply and install soft fall rubber surfacing solutions that not only look spectacular, they are also AS/NZS 4422:2016 compliant.

We can supply and install single colour, multi-colour, or even develop creative custom designs, creating an engaging and safe surface. You can incorporate outdoor learning designs that include shapes, letters and numbers, or engaging outdoor play space designs.

Rubber softfall is designed to reduce impact and the likelihood of injury from falls in the playground environment. With our wet-pour solution, we produce a base layer made from recycled rubber, combine that with the coloured rubber of your choice as the topcoat. The coloured layer is made from premium quality virgin material, combined with UV-stabilised pigments so it retains colour even in the harshest of climates.

#### **APPLICATIONS:**

#### **FEATURES & BENEFITS:**

## INTRODUCING OUR SignatureCARE™ PROGRAM

*The Tuff Maintenance SignatureCARE program is the result of a cumulation of experience and expert synthetic field knowledge. We have developed this program to ensure that our clients' investments continue to perform at the highest standard for many years. Although often misunderstood, regular and specialised maintenance is an integral part of a field's performance in both the short and long term.*

### TAILORED TO SUIT YOUR NEEDS:

The SignatureCARE maintenance program is unique for every project, as each facility has different performance requirements and usage statistics. To ensure your facility performs at its best, the field's type, intensity, and volume of usage will be evaluated, and a customised maintenance plan will be developed. This maintenance plan is then managed via our cloud-based software Passport365, which is a portal shared between users and our maintenance team that allows direct reporting of maintenance needs and visits.

Whether your field is old or new, large or small, the SignatureCARE program guarantees that your investment will be maintained to above industry standard. Each service is completed by our industry-leading surface technicians, who can provide both maintenance and advice of the highest quality.

### SPECIALTY SERVICES AVAILABLE:

- All synthetic surface repairs
- Line replacement
- Temporary line marking
- Infill replenishment
- Drainage cleaning
- Surface sanitisation
- Static conditioning
- Sport accessory supplies
