

# Elmore Roots Successful Planting Method

This is what we have used for years, with tremendous success.

## DEER PROTECTION

Concentrated lab-strength garlic oil clips create a strong scent barrier against browsing deer.

## TREE PAINT

Helps protect the trunk from sun scald in winter.

## SCREEN

Protects the trunk from vole (rodent) and borer beetle damage.

## COMPOST

Enriches the area around the tree and adds beneficial soil life. Enhances overall health of tree. Works as a food and as a mulch.

## LIQUID SEAWEED

Trace minerals help you with transplanting success.

## KELP MEAL

Keeps roots hydrated longer during dry spells.

## PLANTING MIX

Supplies the roots with the minerals it needs for five years. Helps boost soil life. "You only have the chance to improve the bottom of the hole once."
