

DATA CENTER CASTER SOLUTIONS

GLOBAL SUPPORT & STANDARDIZATION

Trusted Solutions

Largest Standard Offering

With over 50 years of proven design and manufacturing experience in data center and business machine casters, Colson Group's portfolio of low-profile solutions leads the industry. Specified by top companies around the world, our solutions ensure mobility and stability throughout all stages of its delivery and life.

- Low profile, high load capacity solutions
- Varying size and capacity ranges
- Dynamic load ratings from 120 to 1,200 lbs. per caster
- Tested to ANSI:ICWM standards
- Innovative brake and wheel options
- RoHS compliant

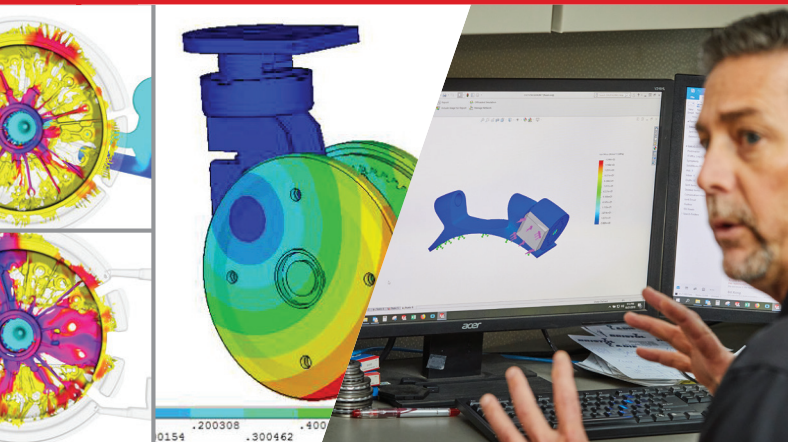

Value Creation

Global Solutions

Leveraging a proprietary global footprint and supply chain, Colson Group helps advance its customers' products and supply chains—all while reducing their R&D time for faster speed to market. With 30 facilities in 13 countries, Colson Group provides local service worldwide.

- Vertically integrated global manufacturing; ISO 9001:2015 QMS certified
- Largest, most established distribution network
- Experienced inside support and field staff
- Global test labs ensure products meet or exceed customer requirements
- Global engineering and application support teams ensure the right caster is specified or designed

Engineered Solutions

Our global team of 30+ experienced engineers have developed numerous custom solutions for data center equipment that address specific customer needs. With over \$5M in R&D invested annually, our extensive global capabilities include:

- 3D parametric solid modeling (SolidWorks)
- 3D Geometric tolerance stack-up analysis
- Finite Element Analysis (FEA)
- Predictive mold-flow analysis
- Materials expertise in steel, thermoplastics, polyurethane, and castings
- Formal NPI (New Product Innovation) stage gate process ensures projects remain on track and budget
