

# BRACELET SIZE GUIDE

Specify Your Scaling Option Prior to Printing. On your print dialog box, make sure that the page scaling is set to 100%. (You can open that box by pressing CTRL+P)

To ensure that your print settings are correct, measure the lines below on your print out to ensure that they correspond to 5 cm or 2 inches.

## INSTRUCTIONS FOR MEASURING BRACELET SIZE

- Cut out the ruler and an opening as indicated, following the dotted line.
- Roll the strip around your wrist with the graduated side visible.
- For the tennis and leather bracelets, please make sure that you measure just above your wrist bone and add approximately half-inch allowance to that measure. In this way, your bracelet will neither be too loose nor too tight.
- If you want to buy a bangle model, close your fingers together, and measure the place where your hand is the widest. Then, by using our chart decide on the size you will go with.
