## SUPER 300 Power Desiccant

**300% Absorption  
Works for 90 Days  
Voyage & Storage Coverage**

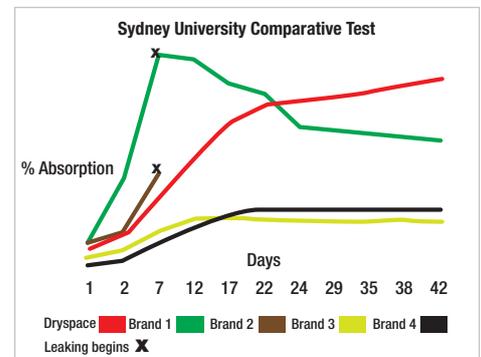

*There is peace of mind knowing NEW SUPER 300 performs overtime to protect your cargo from extreme temperature changes, unpredictable transshipment delays, extended voyage times & unloading hold ups.*

### Reduce Moisture Damage 90 Days. Voyage & Storage

Shipments to & from Australia are at greater risk to moisture damage as goods transit across extreme temperature zones at the equator. Living where we do, we rely upon transshipment hubs where delays often occur. With 35 years experience in shipping goods, we created SUPER 300 to work under these conditions. It works for us. It will work for you.

New SUPER 300 is performance based absorbing for up to 90 days protecting your shipments long after others have failed.

### 300% Absorption

New SUPER 300 is specifically formulated as an ultra efficient hygroscopic desiccant for our particular region. It will increase its original weight 4x fold absorbing up to 300% moisture (water) performing 2 to 3 times better than older silica gel / clay & simple calcium chloride desiccants.

### Leak-proof

Our formulation is stored inside 2 layers of a spun meshed one-way material. Moisture & humidity flows inwards trapping the water as a semi-solid so that nothing drips out & will not leak.

### Natural ingredients

Made from the highest grade naturally occurring Calcium Chloride (CaCl<sub>2</sub>) salt, combined with our organic binder & a gelling agent, SUPER 300 is safe to handle & can be used with all food & agricultural products.

*NEW SUPER 300 is specially formulated for our southern geography. Made of natural non-toxic materials inside a leak proof one-way Tyvek® mesh bag. Water absorbs into a semi-solid proprietary organic binder that doesn't leak, tear or re-absorb for easy disposal with no mess.*
